SUPPLEMENTARY INFORMATION

I. Abstract

The U.S. Census Bureau plans to request an extension of the current Office of Management and Budget (OMB) clearance of the Manufacturers' Shipments, Inventories and Orders (M3) survey. The Manufacturers' Shipments, Inventories, and Orders (M3) survey requests data from domestic manufacturers on form M-3 (SD), which will be mailed at the end of each month. Data requested are shipments, new orders, unfilled orders, total inventory, materials and supplies, work-in-process, and finished goods. It is currently the only survey that provides broad-based monthly statistical data on the economic conditions in the domestic manufacturing sector.

The M3 survey is designed to measure current industrial activity and to provide an indication of future production commitments. The value of shipments measures the value of goods delivered during the month by domestic manufacturers. Estimates of new orders serve as an indicator of future production commitments and represent the current sales value of new orders received during the month, net of cancellations. Substantial accumulation or depletion of unfilled orders measures excess or deficient demand for manufactured products. The level of inventories, especially in relation to shipments, is frequently used to monitor the business cycle.

We do not plan any changes to the M-3 (SD) form. The estimated total annual burden hours will remain 17,200.

II. Method of Collection

Respondents submit data on form M-3 (SD) via mail, or via the Internet. Analysts call respondents who usually report, to obtain data in time for preparing the monthly estimates.

III. Data

OMB Control Number: 0607-0008.

Form Number(s): M-3 (SD).

Type of Review: Regular submission.

Affected Public: Businesses, large and small, or other for profit.

Estimated Number of Respondents: 4,300.

Estimated Time per Response: 20 minutes.

Estimated Total Annual Burden Hours: 17,200.

Estimated Total Annual Cost to Public: \$0.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13 U.S.C. 131 and 182.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: August 22, 2014.

Glenna Mickelson,

Management Analyst, Office of the Chief Information Officer.

SUPPLEMENTARY INFORMATION:

I. Abstract

From December 2009 through April 2010, the Census Bureau contracted the Gallup Organization to conduct a nightly poll of the public's opinion toward the 2010 Census, public awareness of Census promotional efforts, and intent to mail back their Census forms. The nationally representative, probability-based, sample of 200 respondents per night, sampled from RDD and cell frames, estimates, based on aggregating these data over week-long time periods provided nearly immediate feedback on public reaction to national events that could possibly influence response to the 2010 Census, and on the success or failure of our communications campaign messaging.

The Census Bureau used this feedback to make communication campaign decisions during data collection that contributed to achieving a mail-back participation rate of 74%, despite increased vacancy rates due to the economic downturn, increased public skepticism about the role of the Federal Government, and a general decline in survey response rates during the decade that crossed both public and private sector surveys.

From February 2012 through March 2014, the Gallup Organization conducted the Federal Statistical System (FSS) Public Opinion Survey conducted under a contract with the U.S. Census Bureau. The mission critical objective was to track public opinion toward statistics produced by the Federal Government. During this time, we saw a relatively stable level of trust in Federal statistics until several events became headlines in the news, including scandals involving the IRS and NSA and then the Government shutdown of 2013. As these events progressed, we saw a downturn in trust in Federal statistics, which also happened to correlate with a decrease in response rates to several Census Bureau surveys. Without being able to determine causal factors, we are interested in pursuing further data collection to try to understand these possible causal relationships. To date, the data have been gathered nightly from small (n = 200) independent cross-
