Qualitative feedback provides insights into customer or stakeholder perceptions, experiences, and expectations, provides an early warning of service issues, or focuses attention on areas where communication, training, or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative, and actionable communications between NARA and its customers and stakeholders, and allow feedback to contribute directly to program management improvement.

This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: The target population to which generalizations will be made, the
