

percent of target development Panel members (675) and 50 percent of neighborhood Panel members (474) will respond to this flyer and it will take at most 5 minutes. This activity is estimated to result in 1,149 responses, 91.92 hours, and \$1,253 of burden per year.

3. DIR will initiate follow-up phone calls to determine if the most current telephone number(s) in the contact database are correct. This action will only become necessary if there is no response to the annual mailers and there

is no online update and the postcard/flyer is returned. DIR estimates that about half of the neighborhood sample (474) and 10 percent of the target development sample (74) will require a follow-up phone call. We estimate this call will take 5 minutes. We estimate that this activity will be successful for 50% of households (237 neighborhood and 37 target). This activity is estimated to result in 274 responses, 21.92 hours, and \$299 of burden per year.

4. After a pre-determined number of unsuccessful telephone attempts (e.g.,

3–5), a DIR field locator will visit the household to determine if the head of household still lives there. We estimate about 50 percent of the previous cases are expected to be resolved by telephone contact, with the remaining 50 percent (237 neighborhood and 37 target) being assigned to a field locator. We estimate this field location contact will take 5 minutes. This activity is estimated to result in 274 responses, 21.92 hours, and \$299 of burden per year.
