II. Background

In the **Federal Register** notice for the proposed Revisions to the Total Coliform Rule (75 FR 40926, July 14, 2010), the EPA requested comment on the value and cost of periodic distribution system storage tank inspection and cleaning. The EPA received comments regarding unsanitary conditions and contamination that can be found in storage facilities, which are not routinely inspected and cleaned, including breaches and accumulation of sediment, animals, insects and other contaminants. Some commenters suggested the need for a Federal regulation requiring systematic inspection and cleaning because the existing practices are not successful in all cases. Others suggested that regular sanitary surveys conducted by States and the adherence to existing industry guidance could resolve such issues. The comments can be reviewed in the docket for the rule at <http://www.regulations.gov/#!documentDetail;D=EPA-HQ-OW-2008-0878-0283>. This meeting and webinar and the subsequent opportunity to submit comments are intended to collect more data and information about the frequency of distribution system water storage facility inspection and cleaning and the need for more or better risk management approaches.
