■ 14. Section 319.56–4 is revised to read as follows:

§ 319.56–4 Authorization of certain fruits and vegetables for importation.

(a) *Determination by the Administrator.* No fruit or vegetable is authorized importation into the United States unless the Administrator has determined that the risk posed by each quarantine pest associated with the fruit or vegetable can be mitigated by the application of one or more phytosanitary measures designated by the Administrator and the fruit or vegetable is imported into the United States in accordance with, and as stipulated in, the permit issued by the Administrator.

(b) *Designated phytosanitary measures.* (1) The fruits and vegetables are subject to phytosanitary treatments, which could include, but are not limited to, pest control treatments in the field or growing site, and post-harvest treatments.

(2) The fruits and vegetables are subject to growing area pest mitigations, which could include, but are not limited to detection surveys, trapping requirements, pest exclusionary structures, and field inspections.

(3) The fruits and vegetables are subject to safeguarding and movement

mitigations, which could include, but are not limited to, safeguarded transport, box labeling, limited distribution, insect-proof boxes, and importation as commercial consignments only.

(4) The fruits and vegetables are subject to administrative mitigations, which could include, but are not limited to, registered fields or orchards, registered growing sites, registered packinghouses, inspection in the country of origin by an inspector or an official of the national plant protection organization of the exporting country, and operational workplan monitoring.

(5) The fruits and vegetables are subject to any other measures deemed appropriate by the Administrator.

(c) *Authorized fruits and vegetables.*

(1) *Comprehensive list.* The name and origin of all fruits and vegetables authorized importation under this section, as well as the applicable requirements for their importation, may be found on the Internet at http://www.aphis.usda.gov/import_export/plants/manuals/ports/downloads/fv.pdf or <http://www.aphis.usda.gov/favir>.

(2) *Fruits and vegetables authorized importation prior to [EFFECTIVE DATE OF FINAL RULE].* Fruits and vegetables that were authorized importation under this subpart either directly by permit or by specific regulation as of [EFFECTIVE DATE OF FINAL RULE] may continue to be imported into the United States under the same requirements that applied before [EFFECTIVE DATE OF FINAL RULE], except as provided in paragraph (c)(4) of this section.

(3) *Other fruits and vegetables.* Fruits and vegetables not already authorized for importation as described in paragraph (c)(2) of this section may be authorized importation only after:

(i) *Pest risk analysis and mitigations.* APHIS has analyzed the pest risk posed by the importation of a fruit or vegetable from a specified foreign region and has determined that the risk posed by each quarantine pest associated with the fruit or vegetable can be mitigated by the application of one or more phytosanitary measures.

(ii) *Opportunity for public comment.* APHIS has made its pest risk analysis and determination available for public comment for at least 60 days through a notice published in the **Federal Register**.

(iii) *Import authorization.* The Administrator has announced his or her decision in a subsequent **Federal Register** notice to authorize the importation of the fruit or vegetable subject to the phytosanitary measures specified in the notice.

(4) *Changes to phytosanitary measures.* (i) If the Administrator determines that the phytosanitary measures required for a fruit or vegetable that has been authorized importation under this subpart are no longer sufficient to mitigate the pest risk posed by the fruit or vegetable, APHIS will prohibit or further restrict importation of the fruit or vegetable. APHIS will also publish a notice in the **Federal Register** advising the public of its finding. The notice will specify the amended importation requirements, provide an effective date for the change, and will invite public comment on the subject.

(ii) If the Administrator determines that any of the phytosanitary measures required for a fruit or vegetable that has been authorized importation under this subpart are no longer necessary to mitigate the pest risk posed by the fruit or vegetable, APHIS will make new pest risk documentation available for public comment, in accordance with paragraph (c)(3) of this section, prior to allowing importation of the fruit or vegetable subject to the phytosanitary measures specified in the notice.

BILLING CODE 3410–34-P

NUCLEAR REGULATORY COMMISSION

10 CFR Part 72

[NRC–2014–0120]

RIN 3150–AJ42

List of Approved Spent Fuel Storage Casks: Holtec International HI–STORM Underground Maximum Capacity Canister Storage System, Certificate of Compliance No. 1040

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is proposing to amend its spent fuel storage regulations by adding the Holtec International HI-STORM Underground Maximum Capacity (UMAX) Canister Storage System, Certificate of Compliance (CoC) No. 1040, to the “List of approved spent fuel storage casks.” Holtec International intends to provide an underground storage option compatible with the Holtec International HI-STORM FLOOD/WIND System (CoC No. 1032). The Holtec International HI-STORM UMAX Canister Storage System stores a hermetically sealed canister containing spent nuclear fuel in an in-ground vertical ventilated module. The Holtec International HI-STORM UMAX Canister Storage System is designed to provide long-term underground storage of loaded multi-purpose canisters previously certified for storage in CoC No. 1032.

DATES: Submit comments by October 9, 2014. Comments received after this date will be considered if it is practical to do so, but the NRC staff is able to ensure consideration only for comments received on or before this date.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

B. Submitting Comments

Please include Docket ID NRC-2014-0120 in the subject line of your comment submission, in order to ensure that the NRC is able to make your comment submission available to the public in this docket.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <http://www.regulations.gov> as well as enter the comment submissions into ADAMS, and the NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include

identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Procedural Background

This proposed rule is limited to the addition of CoC No. 1040 to the “List of approved spent fuel storage casks.” Because the NRC considers this action noncontroversial and routine, the NRC is publishing this proposed rule concurrently with a direct final rule in the Rules and Regulations section of this issue of the **Federal Register**. Adequate protection of public health and safety continues to be ensured. The direct final rule will become effective on November 24, 2014. However, if the NRC receives significant adverse comments on this proposed rule by October 9, 2014, then the NRC will publish a document that withdraws the direct final rule. If the direct final rule is withdrawn, the NRC will address the comments received in response to these proposed revisions in a subsequent final rule. Absent significant modifications to the proposed revisions requiring republication, the NRC will not initiate a second comment period on this action in the event the direct final rule is withdrawn.

A significant adverse comment is a comment where the commenter explains why the rule would be inappropriate, including challenges to the rule’s underlying premise or approach, or would be ineffective or unacceptable without a change. A comment is adverse and significant if:

(1) The comment opposes the rule and provides a reason sufficient to require a substantive response in a notice-and-comment process. For example, a substantive response is required when:

(a) The comment causes the NRC staff to reevaluate (or reconsider) its position or conduct additional analysis;

(b) The comment raises an issue serious enough to warrant a substantive response to clarify or complete the record; or (c) The comment raises a relevant issue that was not previously addressed or considered by the NRC staff.

(2) The comment proposes a change or an addition to the rule, and it is apparent that the rule would be ineffective or unacceptable without incorporation of the change or addition.

(3) The comment causes the NRC staff to make a change (other than editorial)

to the rule, CoC, or Technical Specifications.

For additional procedural information, including the regulatory analysis and the environmental assessment and finding of no significant impact, see the direct final rule published in the Rules and Regulations section of this issue of the **Federal Register**.

III. Background

Section 218(a) of the Nuclear Waste Policy Act (NWPA) of 1982, as amended, requires that “the Secretary [of the Department of Energy] shall establish a demonstration program, in cooperation with the private sector, for the dry storage of spent nuclear fuel at civilian nuclear power reactor sites, with the objective of establishing one or more technologies that the [Nuclear Regulatory] Commission may, by rule, approve for use at the sites of civilian nuclear power reactors without, to the

maximum extent practicable, the need for additional site-specific approvals by the Commission.” Section 133 of the NWPA states, in part, that “[the Commission] shall, by rule, establish procedures for the licensing of any technology approved by the Commission under Section 219(a) [sic: 218(a)] for use at the site of any civilian nuclear power reactor.”

To implement this mandate, the Commission approved dry storage of spent nuclear fuel in NRC-approved casks under a general license by publishing a final rule which added a new subpart K in part 72 of Title 10 of the *Code of Federal Regulations* (10 CFR) entitled, “General License for Storage of Spent Fuel at Power Reactor Sites” (55 FR 29181; July 18, 1990). This rule also established a new subpart L in 10 CFR part 72 entitled, “Approval of Spent Fuel Storage Casks,” which contains procedures and criteria for

obtaining NRC approval of spent fuel storage cask designs.

IV. Plain Writing

The Plain Writing Act of 2010 (Pub. L. 111–274) requires Federal agencies to write documents in a clear, concise, well-organized manner that also follows other best practices appropriate to the subject or field and the intended audience. The NRC has written this document to be consistent with the Plain Writing Act as well as the Presidential Memorandum, “Plain Language in Government Writing,” published June 10, 1998 (63 FR 31883). The NRC requests comment on the proposed rule with respect to clarity and effectiveness of the language used.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a Texas State Implementation (SIP) revision for control of volatile organic compound (VOC) emissions from storage tanks. The revision implements additional controls in the Dallas-Fort Worth 1997 ozone nonattainment area (DFW area); modifies control requirements in the DFW area, the Houston-Galveston-Brazoria ozone nonattainment area (HGB area), the Beaumont-Port Arthur area and El Paso, Gregg, Nueces and Victoria Counties; and makes non-substantive changes to VOC control provisions that apply in Aransas, Bexar, Calhoun, Matagorda, San Patricio and Travis Counties. In addition, EPA is proposing to find that the SIP revision implements serious area reasonable available control

technology (RACT) controls for the VOC storage source category in the DFW area and continues to implement severe area RACT for this source category in the HGB area as required by the Clean Air Act.
