

visits will allow for improved law enforcement oversight and compliance. In addition to monitoring atoll species, a remote camera system will also provide better management and documentation of any unauthorized entry to the Refuge. The Refuge will remain closed to the general public, with entry only allowed via special use permit.

Refuge staff will provide outreach and interpretation opportunities and develop an environmental education program focusing on “bringing the refuge to the people.” Appropriate cultural practices will also be facilitated through expanding refuge management activities related to cultural resources. We will work with the American Samoa Historical Preservation Office and other partners to conduct archaeological surveys at Rose Atoll NWR, integrate cultural resources into interpretation, and increase dialogue with the Office of Samoan Affairs and local villagers, among other activities.
