NUCLEAR REGULATORY COMMISSION

10 CFR Parts 30, 32 and 35

[NRC-2008-0175]

RIN 3150-AI63

Medical Use of Byproduct Material— Medical Event Definitions, Training and Experience, and Clarifying Amendments; Correction

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule; correction.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) published a proposed rule appearing in the **Federal Register** (FR) on July 21, 2014, to amend the NRC's regulations related to the medical use of byproduct material. The public comment period for the information collection aspects of the proposed rule was to have ended on August 20, 2014. However, the proposed rule inadvertently omitted the one-time implementation costs from the information collection burden estimate. This action sets out the corrected information collection burden estimate in its entirety and allows the public 30 days to comment from the date of publication of this action.

DATES: This correction is effective on September 22, 2014. Submit comments on the information collection aspects of the proposed rule by October 22, 2014.

SUPPLEMENTARY INFORMATION: In FR Doc. 2014-16753 appearing on page 42409 in the **Federal Register** of Monday, July 21, 2014, beginning on page 42435, in the middle column, Section XV, "Paperwork Reduction Act Statement," is corrected to read as follows:

This proposed rule amends information collection requirements that are subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). The rule would reduce the burden for existing information collection requirements associated with NRC Form 313, but would increase burden for 10 CFR parts 30 and 35. This rule has been submitted to the Office of Management and Budget for review and approval of the paperwork requirements.

Type of submission, new or revision: Revision.

The title of the information collection: 10 CFR parts 30, 32, and 35, Medical Use of Byproduct Material—Medical Event Definitions, Training and Experience, and Clarifying Amendments, Proposed Rule.

The form number if applicable: NRC Form 313A Series, "Authorized User Training and Experience and Preceptor Attestation."

How often the collection is required: The information is collected as needed. Reports required under the proposed rule are based on events that exceed limits stipulated by various sections of the proposed rule. The NRC Form 313A Series or equivalent is required when an applicant or licensee applies to have a new individual identified as an Authorized User (AU), Radiation Safety Officer (RSO), Alternate Radiation Safety Officer (ARSO), Authorized Nuclear Pharmacists, or an Authorized Medical Physicist on a medical use license during a new license, a renewal, or an amendment request.

Who will be required or asked to report: Persons licensed under 10 CFR parts 30, 32, and 35 who possess and use certain byproduct material for medical use.

An estimate of the number of annual responses: 12,392 (10 CFR Part 30: 366 responses, 10 CFR Part 35: 8,301 responses, NRC Form 313: 3,725 responses).

The estimated number of annual respondents: 7,845 (1,085 NRC/6,401 Agreement State medical use licensees and 52 NRC/307 Agreement State radiopharmacy licensees).

An estimate of the total number of hours needed annually to complete the requirement or request: 33,038.33 hours (10 CFR Part 30: 4,670.5 hours, 10 CFR Part 35: 33,551.58 hours, NRC Form 313: - 5,183.75 hours). Of the 33,038.33 hours of total burden, an estimated 6,671 hours are associated with recurring requirements and 26,367.33 hours are one-time implementation burdens.

Abstract: The NRC is proposing to amend its regulations related to the medical use of byproduct material. In this action the NRC addresses three ongoing rulemaking projects and several other related topics. First, this rule proposes amendments to the reporting and notification requirements for a Medical Event for permanent implant brachytherapy. Second, the rule proposes changes to the Training and Experience requirements for AUs, medical physicists, RSOs, and nuclear pharmacists; changes to the requirements for measuring Mo contaminations and reporting of failed

technetium and rubidium generators; and changes that would allow ARSOs to be named on a medical license, as well as other clarifying and conforming amendments. Third, the NRC is considering a request filed in a petition for rulemaking (PRM–35–20) to “grandfather” certain board-certified individuals.

The NRC is seeking public comment on the potential impact of the information collections contained in the proposed rule and on the following issues:

1. *Is the proposed information collection necessary for the proper performance of the functions of the NRC, including whether the information will have practical utility?*
2. *Is the estimate of burden accurate?*
3. *Is there a way to enhance the quality, utility, and clarity of the information to be collected?*
4. *How can the burden of the information collection be minimized, including the use of automated collection techniques?*

The public may examine and have copied, for a fee, publicly-available documents, including the draft supporting statement, at the NRC’s PDR, One White Flint North, 11555 Rockville Pike, Room O–1 F21, Rockville, Maryland 20852. The OMB clearance package and rule are available at the NRC’s Web site: <http://www.nrc.gov/public-involve/doc-comment/omb/index.html> for 60 days after the signature date of this notice.

Send comments on any aspect of these proposed information collections, including suggestions for reducing the burden and on the above issues, by October 22, 2014 to the FOIA, Privacy, and Information Collections Branch (T–5 F53), U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, or by Internet electronic mail to INFOCOLLECTS.RESOURCE@NRC.GOV and to the Desk Officer, Danielle Y. Jones, Office of Information and Regulatory Affairs, NEOB–10202, (3150–AI63), Office of Management and Budget, Washington, DC 20503.

You may also email comments to [Danielle Y. Jones@omb.eop.gov](mailto:Danielle.Y.Jones@omb.eop.gov) or comment by telephone at 202–395–1741.

Dated at Rockville, Maryland, this 15th day of September, 2014.

For the Nuclear Regulatory Commission.
Annette Vietti-Cook,
Secretary of the Commission.
