

NEPA (40 CFR parts 1500–1508), and the *BOP Procedures for Implementing NEPA* (28 CFR 61, Appendix A), the BOP prepared an EA to analyze the impacts of awarding one contract to house up to 2,000 low-security, adult male, non-US citizen, criminal aliens within one existing contractor-owned and contractor-operated correctional facility.

It is anticipated that the number of inmates will continue to rise for several reasons. Federal court sentencing guidelines are resulting in longer terms of confinement for serious crimes. Moreover, there is an increase in immigration and offenders, along with a greater effort to combat organized crime and trafficking. As a result, existing BOP facilities are at capacity. In response, the BOP has focused on ways to reduce prison overcrowding by requesting additional contract beds for low security, adult male criminal aliens, expansion of current facilities, and building and operating new medium and high security facilities. The purpose of the project is to acquire additional bed space to address the need to reduce overcrowding in existing BOP facilities as a result of increases in convictions and sentence terms.

The BOP requires flexibility in managing existing low-security bed space as well as the anticipated future needs for low-security bed space. Use of an existing contractor-owned and operated correctional facility provides the BOP the flexibility needed to meet population capacity needs in a timely manner, conform to federal law, and maintain fiscal responsibility while successfully meeting the mission of the BOP.

The process to identify contracting opportunities for securing additional inmate bed space in support of the increasing needs of the BOP involved the BOP advertising for interested vendors to respond to the request for proposal (RFP) with options for meeting the requirements.

Based on the responses to the solicitation, the BOP had two potential alternatives. The solicitation RFP-PCC-0022 (CAR 15 Requirement A) identified the evaluation criteria under which each offeror's proposal would be considered and evaluated. The non-price based evaluation criteria that consists of the following in descending order of importance:

- Past Performance
- Technical Proposal
- Environment
- Small Disadvantaged Business Participation

A geographical restriction associated with the RFP required the facility to be located in one of the following states: Ohio, Michigan, Pennsylvania, Delaware, New Jersey, or New York.

Project Information

The proposed action is to award one contract to house up to 2,000 federal low-security, adult male, non-US citizen, criminal aliens at an existing contractor-owned and contractor-operated correctional facility. Under the Proposed Action, the selected contractor would be required to operate the facility in a manner consistent with the mission and requirements of the BOP. All inmate services would be developed in a manner that complies with the BOP's contract requirements, as well as applicable federal, state, and local laws and regulations. In addition, the facility would be within proximity, and have access to, ambulatory, fire and police protection services.

The federal inmates assigned to this facility would consist primarily of inmates with sentences of 90 months or less remaining to be served. Inmates are anticipated to be federal, low-security, adult male, non-US citizen, criminal aliens; however, the BOP may designate any inmate within its custody to serve their sentence in this facility.

Two existing privately owned and operated correctional facilities in Pennsylvania and Ohio were the only offers received in response to the BOP's solicitation for CAR 15 Requirement A. Each of the following existing facilities has been evaluated in this EA. In addition, the No Action Alternative is evaluated, to determine baseline conditions and comply with the provisions of NEPA.

- Moshannon Valley Correctional Facility. Located in Phillipsburg, Pennsylvania.
- Northeast Ohio Correctional Center. Located in Youngstown, Ohio.

No other facilities are under consideration by the BOP. Although the two alternatives have been evaluated within the EA, an environmentally preferred alternative has not been identified due to the pending contracting action.

Based on the analysis presented in the EA, there would be no significant impacts on environmental and cultural resources, socioeconomic, environmental justice, community facilities and services, transportation and traffic, infrastructure and utilities, noise, and air quality as a result of the implementation of the proposed action under either Alternative 1 or Alternative 2. Therefore, the BOP has determined

there would be no significant impacts associated with the implementation of the proposed action.

Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Powered Industrial Trucks Standard information collection requirements codified in regulations 29 CFR 1910.178. The Standard contains several information collection requirements addressing truck design, construction, and modification, as well as certification of training and evaluation for truck operators. Occupational Safety and Health Act of 1970 sections 2(b)(9), 6(b)(7), and 8(c) authorize this information collection. See 29 U.S.C. 651(b)(9), 655(b)(7), 657(c).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1218-0242.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on September 30, 2014. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB

receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on May 9, 2014 (79 FR 26776).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1218-0242. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.
