SUPPLEMENTARY INFORMATION:

Background: The Federal Motor Carriers Safety Administration (FMCSA) needs a survey of its State partner-grant recipients who support the operation, regulation and enforcement of various mutually-beneficial safety programs. This knowledge will improve the Federal government's understanding of the effectiveness of commercial motor vehicle (CMV) safety related grant programs. The FMCSA is interested in surveying grant recipients to collect information on the strengths, weaknesses, and effectiveness of FMCSA grant programs.

In 2009, the Government Accountability Office (GAO) issued a final report on a FMCSA grant program called Performance Registration Information System Management PRISM. The GAO reported was entitled, "Motor Carrier Safety: Commercial Vehicle Registration Program Has Kept Carriers from Operating, but Effectiveness Is Difficult to Measure, GAO-09-495." The GAO recommended FMCSA measure the PRISM program's effectiveness when the number of States that have the ability to deny, suspend, or revoke registrations of CMVs operated by OOS carriers is sufficient to make such measurements meaningful.

The authority to require Federal Agencies to monitor grants is 2 CFR Chapter I, and Chapter II Parts 200, 215, 220, 225, and 230 Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards. OMB Circular A-110, Reports and Records, sections 50 through 53 set forth the procedures for monitoring and reporting on the recipient's financial and program performance and the necessary standard reporting forms.

The Agency proposes to collect the data for this project via electronic mail surveys and conduct clarifying interviews as appropriate. The information collection supports the DOT's Strategic Goal of Safety, and will help confirm whether the program(s) improve public health and safety by reducing transportation-related fatalities and injuries. Therefore, the purpose of this ICR is to conduct a survey using Form MCSA-5888 to evaluate the effectiveness of FMCSA's grant programs through the use of in-person interviews and electronic surveys. The

survey will not be statistical in nature, as the intention is to receive the comments of all affected state partners. The survey will not exceed 30 questions and the complexity of the question structure will be Likert scale and short responses. The decision to use the Likert scale over the ordinal scale is the numbers in the ordinal level indicate the relative position of items, but not the magnitude of difference that you get from the Likert scale. For example, the survey will present a question like "The grant funding provided in support of your program is adequate to meet all aspects of the mission." The response options may include:

1. Strongly disagree
2. Disagree
3. Neutral
4. Agree
5. Strongly agree
6. Not Applicable

The Agency will use this information to establish a baseline of our grant programs from the grantee's perspective for use in future grant-related decision making, to include: (1) Assessing the impacts of proposed rules, (2) identifying potential improvements in its grant supported safety programs, and (3) complement future budget and resource related decisions.

Title: FMCSA Annual Grant Program Effectiveness Survey.

OMB Control Number: 2126-00XX.

Type of Request: New information collection.

Respondents: State Grant Recipients.

Estimated Number of Respondents: 50 State Respondents.

Estimated Time per Response: 45 minutes per response.

Expiration Date: N/A. This is a new ICR.

Frequency of Response: Once.

Estimated Total Annual Burden: 49 hours [(50 electronic mail-in respondents × 45 minutes/60 minutes) + (15 State personnel interviews × 45 minutes/60 minutes) = 49]. Minutes per response = 48.75 rounded to 49.]

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) whether the proposed collection is necessary for the performance of FMCSA's functions; (2) the accuracy of the estimated burden; (3) ways for FMCSA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize or include your comments in the request for OMB's clearance of this information collection.

Issued under the authority delegated in 49 CFR 1.87 on: September 30, 2014.

G. Kelly Regal,

Associate Administrator, Office of Research and Information Technology and Chief Information Officer.

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2014-0335]

Parts and Accessories Necessary for Safe Operation; Application for an Exemption From Dealers Choice Truckaway System, Inc.

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of application for exemption; request for comments.

SUMMARY: FMCSA requests public comment on an application for exemption from Dealers Choice Truckaway System, Inc. (Truckmovers) to allow the use of plastic blocks to build up the height of the front end of a towed vehicle in driveaway-towaway operations. The Federal Motor Carrier Safety Regulations (FMCSRs) permit the use of "hardwood blocks of good quality" for this purpose but the use of materials other than hardwood blocks is not addressed. Truckmovers believes the use of ultra-high molecular polyethylene plastic blocks will maintain a level of safety that is equivalent to the level of safety achieved without the exemption. Truckmovers is requesting the temporary exemption in advance of petitioning FMCSA to conduct a rulemaking to amend 49 CFR 393.71(k)(4) to allow the use of vehicle support blocks made of any suitable material to support the weight of vehicles when towing multiple vehicles in driveaway-towaway operations.

SUPPLEMENTARY INFORMATION:

Background

Section 4007 of the Transportation Equity Act for the 21st Century (TEA-

21) [Pub. L. 105-178, June 9, 1998, 112 Stat. 401] amended 49 U.S.C. 31315 and 31136(e) to provide authority to grant exemptions from the Federal Motor Carrier Safety Regulations (FMCSRs). On August 20, 2004, FMCSA published a final rule (69 FR 51589) implementing section 4007. Under this rule, FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public with an opportunity to inspect the information relevant to the application, including any safety analyses that have been conducted. The Agency must also provide an opportunity for public comment on the request.

The Agency reviews the safety analyses and the public comments and determines whether granting the exemption would likely achieve a level of safety equivalent to or greater than the level that would be achieved by the current regulation (49 CFR 381.305). The decision of the Agency must be published in the **Federal Register** (49 CFR 381.315(b)). If the Agency denies the request, it must state the reason for doing so. If the decision is to grant the exemption, the notice must specify the person or class of persons receiving the exemption and the regulatory provision or provisions from which an exemption is granted. The notice must specify the effective period of the exemption (up to 2 years) and explain the terms and conditions of the exemption. The exemption may be renewed (49 CFR 381.315(c) and 49 CFR 381.300(b)).

Truckmovers Application for Exemption

Truckmovers applied for an exemption from 49 CFR 393.71(k)(4) to allow the use of plastic support blocks in lieu of hardwood blocks to increase the height of a towed vehicle in driveaway-towaway operations. A copy of the application is included in the docket referenced at the beginning of this notice.

In its application, Truckmovers states that without the proposed exemption it will not be able to utilize plastic support blocks because 49 CFR 393.71(k)(4) specifically identifies the use of hardwood blocks to build up the height of the front end of a towed vehicle in driveaway-towaway operations. Truckmovers provided information regarding the development of ultra-high molecular polyethylene plastic blocks with a compression rating of 3,300 psi, which can withstand extreme heat and cold. These plastic blocks are not susceptible to decomposition and erosion like wood blocks, allowing for their re-use. The high compression
