Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, SAMHSA will publish a summary of information collection requests under the Office of Management and Budget (OMB) review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276–1243.

Project: Identifying Core Competencies of Peer Workers in Behavioral Health Services (Behavioral Health Services) —NEW

SAMHSA's Center for Mental Health Services' project, Bringing Recovery Supports to Scale Technical Assistance Center Strategy (BRSS TACS) is requesting OMB's approval for a data collection project entitled, "Identifying Core Competencies of Peer Workers in Behavioral Health Services." The BRSS TACS team intends to use two instruments to collect original data to inform the ongoing development of core competencies for peer workers in behavioral health care services. These instruments are:

- Core Competencies Survey with Peer Workers
 - Telephone Interview of Peer Workers
- The primary purpose for this information is to appraise the importance of specific competencies to the work of peer workers who are currently employed in behavioral health settings. The Core Competencies Survey will collect peer workers' ratings of the importance of different competencies to their work. The Telephone Interview of Peer Workers will collect peer workers' experiences with and opinions about the competencies on the survey. They will also be asked how they might use the competencies in their work. The Core Competencies Survey and the

Telephone Interview are seen as critical to the development of core competencies for peer workers because they integrate the perspective of people who are currently employed as peer workers in the behavioral health care workforce and have been judged as competent by another colleague.

While peer workers have become critical components of recovery-oriented systems, paid peer positions and roles are relatively new additions to the behavioral health workforce. There are basic questions about how to define these roles. There are additional uncertainties about how best to prepare people in recovery for the role of peer worker and how to supervise and evaluate the job performance of peer workers. Developing a set of core competencies is an important step in responding to these questions and may be a valuable activity in expanding peer roles in behavioral health.

Although training programs for peer workers in the behavioral health system have existed for over a decade, there have been no attempts to standardize the content or the models of training. To date, no national consensus defines standards for peer worker training programs. Training programs differ in length, ranging from 30 to 105 hours of face-to-face training and vary widely in the knowledge and skills that they teach trainees (SAMHSA, 2012).

The Core Competency Project will describe the foundational knowledge, skills, and attitudes required by peer workers to perform their roles in a wide variety of behavioral health programs and services. Peer-provided recovery support services typically involve providing social support, linking people to community resources, assisting with decision-making activities, and a host of educational and recreational activities (CSAT, 2009; SAMHSA, 2012). In addition, peer workers facilitate educational and support groups and advocate for service improvements. SAMHSA defines peer-provided recovery support as, "a set of non-clinical, peer-based activities that engage, educate and support an individual successfully to make life changes necessary to recover from disabling mental illness and/or substance use disorder conditions" (CSAT, 2009). While some peer workers are performing advanced or specialized competencies within the behavioral health field, the core competencies described will include the foundational competencies required by all peer workers working in a variety of environments and with a diversity of people.

It is critical to communicate to the behavioral health field and behavioral health authorities about the foundational knowledge, skills, and attitudes needed by peer workers. Because of the anticipated continued demand for peers in the behavioral health workforce, SAMHSA has prioritized the development of peer-delivered recovery support services across mental health and substance use disorder services. In an effort to deliver services of uniformly high quality, the core competencies of peer workers will be described so that states and other credentialing bodies will be able to establish uniform standards for peer workers.

In addition, clear descriptions of core competencies will assist behavioral health authorities with their strategic workforce planning efforts. The description of core competencies will inform services and peer workforce training programs of the basic requirements needed by peer workers in behavioral health services. The competencies will provide guidance to behavioral health programs when writing job descriptions and performances evaluations. In many communities, job descriptions lack uniformity and specificity and do not reflect accurately the focus of peer-provided recovery support services.

The results of these surveys will contribute to the creation of competency descriptions that will provide guidance to organizations, programs, states, and regions to strengthen their peer workforce development efforts. These core competencies will inform training programs and state certification entities about the essential skills, knowledge, and attitudes needed by peer workers in a range of roles in behavioral health services. Currently, 33 states offer certification for their peer workers and a growing number of states use Medicaid funds to reimburse for peer support services (Daniels et al., 2014). Despite the growth of the behavioral health peer workforce; there are inconsistencies in the requirements for these certifications across different states.

For behavioral health organizations and programs, core competencies will provide guidance for job descriptions for peer workers and improve the recruitment of potential workers by providing fair and unbiased criteria for hiring and making sure everyone is assessed against the same framework. Core competency descriptions have the potential to strengthen the workforce through improved training and preparation of peer workers. Behavioral health programs and organizations can

use the core competencies to improve performance evaluations by providing a framework to discuss and assess performance.

Core competencies have the potential to contribute to a “culture of competence” in which peer workers could use the competencies to engage in accurate self-assessment and seek out experiences to improve their competencies. For peer workers, core competencies could help to clarify what is expected in their role and will assist them in assessing their own strengths and limitations as a provider of peer support.

At this time, SAMHSA is requesting approval to use these two forms. The forms are described here:

1. *Peer Worker Telephone Interviews*: Peer worker interviews will be conducted by telephone with 20 peer workers to gather descriptive details about the interviewees’ use of the core competencies included in the quantitative surveys, their opinions about specific competencies, and their

beliefs about the usefulness of articulating core competencies for their peer worker roles. Qualitative interviews may also produce examples of how peer workers use specific competencies.

The information gathered by the Core Competencies Survey and the Peer Worker Telephone Interview will help SAMHSA guide the behavioral health field with workforce development efforts related to peer workers. This information is crucial to providing technical assistance to states, behavioral health organizations, peer-run and recovery community organizations, and organizations and institutions that provide training to peer workers in behavioral health.

2. *Core Competencies Survey*: The Core Competencies Survey was developed through an extensive process of literature reviews, synthesis of the competencies, expert panel review, and consensus-building activities. The Core Competencies Survey has 61 items and uses a 5-point Likert scale from 1-

unimportant to 5-very important. The items on the survey are specific competencies that were developed by the BRSS TACS team, their partners, and experts in peer-provided services in behavioral health. Respondents to the Core Competencies Survey will also complete a section on demographic characteristics of the participant’s gender, age, race/ethnicity, geographic location, level of education, monthly income, length of time as a peer worker, current field of employment, and certification status. Demographic data will be used to describe the survey respondents. The response to the current field of employment questions will be used to categorize the respondent as working primarily in addiction services, mental health services, or services for people with co-occurring disorders, a variable that will be included in specific analyses of the data.

The chart below summarizes the annualized burden for this project.

Type of respondent	Number of respondents	Responses per respondent	Total number of responses	Hours per response	Total annual burden hours
Peer workers for interview	20	1	20	1	20
Peer workers for survey	100	1	100	1	100
Total	120	120	120

Written comments and recommendations concerning the proposed information collection should be sent by November 10, 2014 to the SAMHSA Desk Officer at the Office of Information and Regulatory Affairs, OMB. To ensure timely receipt of comments, and to avoid potential delays in OMB’s receipt and processing of mail sent through the U.S. Postal Service, commenters are encouraged to submit their comments to OMB via email to: OIRA_Submission@omb.eop.gov. Although commenters are encouraged to send their comments via email, commenters may also fax their comments to: 202–395–7285. Commenters may also mail them to: Office of Management and Budget, Office of Information and Regulatory Affairs, New Executive Office Building, Room 10102, Washington, DC 20503.

Summer King,
Statistician.

BILLING CODE 4162–20–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0106]

Agency Information Collection Activities: Petition for Qualifying Family Member of a U–1 Nonimmigrant, Form I–929; Extension, Without Change, of a Currently Approved Collection

ACTION: 60-day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) invites the general public and other Federal agencies to comment upon this proposed extension of a currently approved collection of information. In accordance with the Paperwork Reduction Act (PRA) of 1995, the information collection notice is published in the **Federal Register** to obtain comments regarding the nature of the information collection, the categories of respondents, the estimated burden (i.e. the time, effort, and resources used by the respondents to

respond), the estimated cost to the respondent, and the actual information collection instruments.

DATES: Comments are encouraged and will be accepted for 60 days until December 8, 2014.

ADDRESSES: All submissions received must include the OMB Control Number 1615–0106 in the subject box, the agency name and Docket ID USCIS–2009–0010. To avoid duplicate submissions, please use only one of the following methods to submit comments:

- (1) *Online.* Submit comments via the Federal eRulemaking Portal Web site at www.regulations.gov under e-Docket ID number USCIS–2009–0010;
- (2) *Email.* Submit comments to USCISFRComment@uscis.dhs.gov;
- (3) *Mail.* Submit written comments to DHS, USCIS, Office of Policy and Strategy, Chief, Regulatory Coordination Division, 20 Massachusetts Avenue NW., Washington, DC 20529–2140.

SUPPLEMENTARY INFORMATION:

Comments

Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking
