

information will be made available in the Agency's public dockets and posted on EPA's WIPP Web site. The EPA is currently considering how anticipated changes in the facility design will impact the recertification process.

With today's notice, the Agency solicits public comment on the DOE's documentation of whether the WIPP facility continues to comply with the disposal regulations. A copy of the application is available for inspection on the EPA's WIPP Web site (<http://www.epa.gov/radiation/wipp/2014application.html>) and in the public dockets described in the **ADDRESSES** section. Other background information related to the Agency's recertification activities are also available in our public dockets and on our WIPP Web site. The EPA will evaluate the complete application in determining whether the WIPP continues to comply with the radiation protection standards for disposal. In addition, the EPA will consider public comment and other information relevant to the WIPP's compliance. The Agency is most interested in public comment on issues where changes have occurred that may potentially impact the WIPP's ability to remain in compliance with the requirements in the EPA's disposal regulations, as well as any areas where the public believes that changes have occurred and have not been identified by the DOE. Additionally the Agency expects to provide public meetings in New Mexico during the review process to encourage and facilitate participation by interested stakeholders.

The first step in the recertification process is a "completeness" determination. The EPA will make this completeness determination as a first step in its more extensive technical review of the application. This determination is based on a number of the Agency's WIPP-specific guidances, most notably, the "Compliance Application Guidance" (CAG; EPA Pub. 402-R-95-014) and "Guidance to the U.S. Department of Energy on Preparation for Recertification of the Waste Isolation Pilot Plant with 40 CFR Parts 191 and 194" (Docket A-98-49, Item II-B3-14; December 12, 2000). Both guidance documents include guidelines regarding: (1) Content of certification/recertification applications; (2) documentation and format requirements; (3) time frame and evaluation process; and (4) change reporting and modification. The Agency developed these guidance documents to assist the DOE with the preparation of any compliance application for the WIPP. It is the Agency's intent that these guidance documents give the DOE

and the public a general understanding of the information that is expected to be included in a complete application of compliance. However, the DOE does not have to resubmit information already supplied to the EPA in prior recertification applications. Thus, the focus of each recertification is on any changes to the disposal system since the previous recertification decision (in this case, 2009-2010). The EPA may request additional information as necessary from the Department to ensure the completeness of the CRA.

Once the 2014 recertification application is deemed complete, the EPA will provide the DOE with written notification of its completeness determination and publish a **Federal Register** notice announcing this determination. All correspondence between the EPA and the DOE regarding the completeness of the CRA-2014, as well as any additional supplemental information submitted by the Department, will be posted on our Web site and placed in the public dockets.

The EPA will make a final decision as to whether the WIPP continues to meet the disposal regulations after each of the aforementioned steps (technical analysis of the application, issuance of a notice on the CRA-2014's completeness in the **Federal Register**, and analyses of public comment) have been completed. As required by the WIPP LWA, the Agency will make a final recertification decision within six months of issuing its completeness determination.

List of Subjects in 40 CFR Part 191 and 194

Environmental protection, Radiation protection, Transuranic radioactive waste, Waste treatment and disposal, Waste Isolation Pilot Plant.

Dated: October 1, 2014.

Michael P. Flynn,

Director, Office of Radiation and Indoor Air.

BILLING CODE 6560-50-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[**MB Docket No. 13-51; RM-11692; DA 14-1362**]

Radio Broadcasting Services; Ehrenberg, Arizona

AGENCY: Federal Communications Commission.

ACTION: Proposal rule; dismissal.

SUMMARY: The Audio Division dismisses as moot the Petition for Rule Making

filed by S and H Broadcasting, LLC, proposing the substitution for Channel 228C2 for vacant Channel 286C2 at Ehrenberg, Arizona because the channel substitution was made in another proceeding, MB Docket No. 11-207. The Audio Division also grants the "hybrid" application for Station KQCM, North Shore, California, File No. BPH-20120316ABT.

DATES: October 10, 2014.

ADDRESSES: Secretary, Federal Communications Commission, 445 12th Street SW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Rolanda F. Smith, Media Bureau, (202) 418-2700.

SUPPLEMENTARY INFORMATION: This is a synopsis of the *Report and Order*, MB Docket No. 13-51, adopted September 18, 2014, and released September 19, 2014. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC's Reference Information Center at Portals II, CY-A257, 445 12th Street SW., Washington, DC 20554. This document may also be purchased from the Commission's duplicating contractors, Best Copy and Printing, Inc., 445 12th Street SW., Room CY-B402, Washington, DC 20554, telephone 1-800-378-3160 or via email www.BCPIWEB.com. This document does not contain information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104-13. This document is not subject to the Congressional Review Act. (The Commission is not required to submit a copy of this *Report and Order* to Government Accountability Office, pursuant to the Congressional Review Act, see 5 U.S.C. Section 801(a)(1)(A) because no rule changes were made).
