SUPPLEMENTARY INFORMATION:
Proposed Action: Proposed Revision
of BPA’s Billing Credits Policy.

Process to Date: Bonneville Power
Administration (BPA) worked with its
customers throughout 2014 to explore
improvements to its Energy Efficiency
(EE) program. Based on the collaborative
work with its customers, BPA proposes
to revise its Billing Credits Policy to
offer a Billing Credit program for
conservation pursuant to section 6(h) of
the 1980 Pacific Northwest Electric
Power Planning and Conservation Act
that focuses on the independent
conservation activity of BPA’s
customers and the potential of that
activity to reduce the BPA
Administrator’s need to acquire resources from conservation. BPA’s existing Billing Credits Policy interprets the Billing Credits provisions in the Northwest Power Act, prescribes criteria for customer and resource eligibility, and establishes procedures for granting Billing Credits. With the proposed revision of BPA’s Billing Credits Policy, BPA would consider customer requests for Billing Credits in exchange for a customer’s independent acquisition of conservation performed during the FY2016–2017 rate period and throughout the duration of customers’ existing Regional Dialogue contracts.

Billing Credit Amount

BPA proposes to develop a formula for determining the Billing Credit amount based on the costs that BPA avoids by not providing the customer Energy Efficiency Incentive (EEI) funding under Energy Conservation Agreements (ECA). The formula would be designed with the intent to reasonably assure rate neutrality for all customers, whether or not they choose to participate in the Billing Credit program.

The formula would be constructed as follows. BPA would determine the average annual incremental cost that BPA would incur by borrowing for, and managing the distribution of, EEI funds for the participating customers. In making that determination, BPA would use a comparable amortization period and interest rates matching those forecast in the rate case for the initial years the Billing Credit would be granted. The average annual incremental cost over the amortization period would represent the annual Billing Credit amount that a participating customer is expected to receive.

BPA’s final rates would be updated to account for customer choices to forego the EEI and to include the costs of Billing Credits special provision in its Regional Dialogue Contract that would define the amount of predefined conservation savings the customer is obligated to achieve, which is expected to be the same amount that would have been achieved under the ECA.

Public Involvement

BPA has established a 30-day comment period during which customers, stakeholders, and any other interested parties are invited to comment on the proposed policy revision. This comment period will help BPA ensure that a full range of issues related to this proposal is addressed in an Administrator’s Record of Decision. BPA will consider and respond to comments received on the proposed policy revision. BPA’s subsequent decision will be documented in an Administrator’s Record of Decision.

National Environmental Policy Act

BPA is in the process of assessing the potential environmental effects of the proposed billing credits policy revision consistent with the National Environmental Policy Act. Comments regarding the potential environmental effects of the proposal may be submitted to Katherine Pierce, NEPA Compliance Officer, KEC–4, Bonneville Power Administration, 905 NE 11th Avenue, Portland, OR 97232. Any such comments received by the comment deadline will be considered by BPA’s NEPA compliance staff in the NEPA process that will be conducted for this proposal.

Issued in Portland, Oregon, on October 1, 2014.

Elliot E. Mainzer,
Administrator and Chief Executive Officer.
