RIN 0648–BE34

Magnuson-Stevens Act Provisions; Fisheries off West Coast States; Regulatory Amendment to Pacific Coast Groundfish Fisheries Trawl Rationalization Program for the Start of 2015

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: This proposed rule would revise regulations for the Pacific Coast Groundfish fishery with a target implementation date of January 1, 2015. Final implementation of the 2015–2016 biennial harvest specifications and management measures will likely be delayed beyond January 1, 2015. NMFS has identified two issues that must be addressed prior to January 1, 2015, to prevent interruption of ongoing fisheries and to allow harvest of the total allowable groundfish catch. This action would address those issues by revising groundfish regulations in two ways. First, this action would replace language that was inadvertently deleted after a series of temporary rulemakings. This would reinstate a mechanism whereby

NMFS can issue interim groundfish allocations at the beginning of the year, allowing the Pacific coast groundfish fishery to continue in years when annual groundfish harvest specifications are expiring and new ones are not yet finalized, as is likely for January 1, 2015. Second, this action would amend regulations to extend NMFS' authority to issue the full shorebased trawl allocation of groundfish to current quota share holders in the Shorebased Individual Fishing Quota Program. Specifically, the rule would allow NMFS to issue that portion of the allowable catch currently allocated to an Adaptive Management Program (AMP), to quota share holders until final criteria and a process for distribution of the AMP quota shares is developed and implemented.
