TV pickup licensees record their receive-only sites in the Universal Licensing System (ULS) database, including all fixed service locations. The TV pickup stations, licensed under Part 74 of the Commission's rules, make it possible for television and radio stations and networks to transmit program material from the sites of breaking news stories or other live events to television studios for inclusion in broadcast programs, to transmit programming material from studios to broadcasting transmitters for delivery to consumers' televisions and radios, and to transmit programs between broadcast stations. Registering the receive sites will allow analysis to determine whether Fixed Service links will cause interference to TV pickup stations.

I. Background

On October 1, 2014, the Commission's Wireline Competition Bureau released a public notice announcing the activation of a secure web portal for the electronic filing of information and certifications in response to the special access data collection. The web portal is available at <https://specialaccessfiling.fcc.gov/spadc/login>.

This web portal launch further implements the collection outlined by the Commission in its December 11, 2012 Report and Order and Further Notice of Proposed Rulemaking, which requires providers and purchasers of special access services and certain entities providing "best efforts" services in the same areas as price-cap local exchange carriers, to submit data and information for a comprehensive evaluation of the special access market. Responses to the collection are due by December 15, 2014.

The Bureau will conduct an instructional webinar well in advance of the filing deadline to further educate respondents on the electronic submission process. Additional information on the data collection and the underlying special access rulemaking proceeding can be found at <http://www.fcc.gov/encyclopedia/special-access-data-collection-overview-0>.
