

MNGR requests relief from 49 CFR 230.17, *One thousand four hundred seventy-two (1472) service day inspection*. Specifically, MNGR is petitioning for a delay of the 1472 service-day inspection (SDI) due on April 29, 2014, until December 31, 2014. The delay of the SDI would allow No. 4 to complete the 2014 MNGR winter holiday operating season. To date, No. 4 has used 482 service days and requires 30 of the remaining 990 service days to finish the 2014 operating schedule.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov and in person at the U.S. Department of Transportation's (DOT) Docket Operations Facility, 1200 New Jersey Avenue SE., W12-140, Washington, DC 20590. The Docket Operations Facility is open from 9 a.m. to 5 p.m., Monday through Friday, except Federal Holidays.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

Petition for Waiver of Compliance

In accordance with Part 211 of Title 49 Code of Federal Regulations (CFR), this document provides the public notice that by a document dated July 24, 2014, Grand Canyon Railway (GCR) petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR Part 229, Railroad Locomotive Safety Standards. FRA assigned the petition Docket Number FRA-2014-0074.

Specifically, GCR petitioned for a waiver of compliance from 49 CFR 229.140, *Alerters*, which requires all controlling locomotives operating at speeds greater than 25 mph to be equipped with a functioning alerter effective January 1, 2017. GCR currently has five locomotives that would fall under this regulation. GCR cites the cost of equipping the locomotives with alerters, the fact that they operate with two crew members in the operating cab per Arizona State law, and its 25-year record of no reportable accidents attributable to nonvigilant crew members as justification for this relief.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov and in person at the U.S. Department of Transportation's (DOT) Docket Operations Facility, 1200 New Jersey Avenue SE., W12-140, Washington, DC 20590. DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA-2014-0101]

Petition for Waiver of Compliance

In accordance with Part 211 of Title 49 Code of Federal Regulations (CFR), this document provides the public notice that by a document dated October 3, 2014, the Sonoma-Marín Area Rail Transit District (SMART) petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR Part 236-Rules, Standards, and Instructions Governing the Installation, Inspection, Maintenance, and Repair of Signal and

Train Control Systems, Devices, and Appliances. FRA assigned the petition Docket Number FRA–2014–0101.

Specifically, SMART seeks temporary relief from the requirements of 49 CFR 236.0—*Applicability, minimum requirements, and penalties*.

SMART proposes to perform acceptance testing of new diesel multiple units (DMUs) at speeds of up to 79 miles per hour (MPH) on trackage without a block signal system, as required in 49 CFR 236.0(c)(2).

SMART is scheduled to receive its pilot two-car set of DMUs in February 2015. However, SMART's Enhanced Automatic Train Control (E–ATC) system is not scheduled to be commissioned until 2016. SMART seeks permission to perform limited nonrevenue testing of its new fleet of DMUs at a speed not to exceed 79 mph, solely on a remote 6.3-mile segment of track, absent the installation of a block signal system. SMART is seeking to perform testing under this temporary waiver until its E–ATC system is fully commissioned.

SMART has submitted a test plan with its petition that outlines the safety procedures that are to be in place during the testing.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov and in person at the U.S. Department of Transportation's Docket Operations Facility, 1200 New Jersey Avenue SE., W12–140, Washington, DC 20590.
