[Docket No. PF14-1-000]

Sabal Trail Transmission, LLC; Supplemental Notice of Intent To Prepare an Environmental Impact Statement for the Planned Southeast Market Pipelines Project and Request for Comments on Environmental Issues Related to New Alternatives Under Consideration

In response to concerns raised about the Sabal Trail Transmission LLC's (Sabal Trail) planned Sabal Trail Project (Project),¹ additional pipeline route alternatives and compressor station location alternatives are now being considered. These alternatives which are described below would affect new landowners; therefore, the Federal Energy Regulatory Commission (FERC or Commission) is issuing this supplemental notice (Notice) to provide these landowners and other interested

parties an opportunity to comment on the Project. The FERC is the lead federal agency responsible for conducting the environmental review of this Project. The Commission's staff will prepare an environmental impact statement (EIS) that discusses the environmental impacts of the Project. This EIS will be used in-part by the Commission to determine whether the Project is in the public convenience and necessity.

You have been identified as a landowner or an interested party that may be affected by new alternatives being considered or by the corresponding segment of the currently planned route. Information in this Notice was prepared to familiarize you with these new alternatives, the Project as a whole, and the Commission's environmental review process, and instruct you on how to submit comments about the Project and the alternatives under consideration. This Notice is also being sent to: Federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; other interested parties; and local libraries and newspapers. We encourage elected officials and government representatives to notify their constituents about the Project and inform them on how they can comment on their areas of concern. Please note that comments on this Notice should be filed with the Commission by November 14, 2014.

If your property would be affected by one of the alternatives under consideration, you should have already been contacted by a Sabal Trail representative. A Sabal Trail representative may have also contacted you or may contact you in the near future about the acquisition of an easement to construct, operate, and maintain the planned facilities or request permission to perform environmental surveys on your property. Some landowners may not be contacted if the alternative across their property is found to be either not feasible or not environmentally preferable to other alternatives being considered. If the Commission approves the Project, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the pipeline company could initiate condemnation proceedings where compensation would be determined in accordance with state law.

To help potentially affected landowners and other interested parties better understand the Commission and its environmental review process, the "For Citizens" section of the FERC Web

site (www.ferc.gov) provides information about getting involved in FERC jurisdictional projects, and a citizens' guide entitled "An Interstate Natural Gas Facility On My Land? What Do I Need to Know?" This guide addresses a number of frequently asked questions, including the use of eminent domain and how to participate in the Commission's proceedings.

Project Background

On October 16, 2013 the Commission's environmental staff approved Sabal Trail's request to use the Commission Pre-Filing Process for the Project. The purpose of the Pre-Filing Process is to encourage the early involvement of interested stakeholders to identify and resolve project-related issues before an application is filed with the Commission. On February 18, 2014 the Commission issued a Notice of Intent to Prepare an Environmental Impact Statement for the Planned Southeast Market Pipelines Project, Request for Comments on Environmental Issues, and Notice of Public Scoping Meetings.

During the course of the Pre-Filing Process, numerous concerns have been expressed about the potential environmental impacts of the Project. Based on the merits of these comments and to ensure that public concerns are fully considered during the Pre-Filing Process, additional alternatives have been identified and are being considered.

Project Summary

As noted previously, the Project is part of the SMP Project and will be reviewed concurrently along with the Florida Southeast Connection Project and the Hillabee Expansion Project. The SMP Project would involve the construction and operation of over 650 miles of interstate natural gas transmission pipeline and associated facilities in Alabama, Georgia, and Florida. The Project would connect with the Hillabee Expansion Project in Alabama, and the Florida Southeast Connection Project in Florida.

The Sabal Trail portion of the SMP Project would involve the construction and operation of approximately 460 miles of 36-inch-diameter natural gas transmission pipeline beginning in Tallapoosa County, Alabama and ending in Osceola County, Florida. Sabal Trail also plans to construct and operate approximately 14 miles of 36-inch-diameter natural gas transmission pipeline in Osceola and Orange Counties, Florida (Hunters Creek Line) and approximately 24 miles of 24-inch-diameter natural gas transmission

¹ The Project is one of three projects being reviewed concurrently as the Southeast Market Pipelines Project (SMP Project).
