

Tests That May Be Used in the NRS During a Sunset Period Ending on June 30, 2016

For the four tests listed above with approvals extended through June 30, 2015, the Secretary will determine whether the test publishers have met the conditions necessary for full approval without conditions. If the Secretary determines that the conditions have not been met for any of these four tests and the Secretary therefore does not provide full approval beyond June 30, 2015, those tests may still be used in the NRS during a sunset period ending on June 30, 2016.

Expiring Tests

The sunset period for an expiring test allows a State and local provider to transition to other tests suitable for use in the NRS. The State and local provider may use the transition period to select new tests, purchase appropriate inventories of assessment materials, and provide training to staff.

Revocation of Tests

Under certain circumstances, the Secretary may revoke the determination that a test is suitable (see 34 CFR 462.12(e)). If the Secretary revokes the determination of suitability, the Secretary announces through the **Federal Register** and posts on the Internet at www.nrsweb.org a notice of that revocation, along with the date by which States and local eligible providers must stop using the revoked test.
