Abstract: Respondents are owners or operators of facilities performing polymeric coating of supporting substrates. NSPS Subpart VVV applies to each coating operation and any on-site mix preparation equipment used to prepare coating for the polymeric coating of supporting substrates, which commences construction, modification, or reconstruction after April 30, 1987. The rule establishes standards for VOC use, emission reduction limits, and capture and recovery of VOC emissions. The recordkeeping, monitoring, and reporting requirements allow the regulatory agencies to determine compliance with the standard.

Form Numbers: None.

Respondents/affected entities:

Owners or operators of facilities performing polymeric coating of supporting substrates.

Respondent’s obligation to respond: Mandatory (40 CFR part 60, Subpart VVV).

Estimated number of respondents: 59 (total).

Frequency of response: Initially, quarterly, and semiannually.

Total estimated burden: 13,667 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$1,995,496 (per year), includes \$657,500 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the total estimated burden, capital/startup, and O&M costs as currently identified in the

OMB Inventory of Approved Burdens. This increase is due to industry growth and is not due to any program changes.

There is an apparent decrease in the Agency labor burden hours due to a summation error in the most recently approved ICR. This error resulted in the overestimation of Agency burden. EPA has identified and reconciled this discrepancy during the preparation of this ICR renewal, hence the apparent burden decrease.

Acting Director, Collection Strategies Division.

Abstract: EPA developed regulations under the Clean Air Act Amendments of 1990 (CAA) regarding the use and disposal of class I and class II ozone-depleting substances used as refrigerants during the service, maintenance, repair, or disposal of refrigeration and air-conditioning equipment. Section 608(c) of the CAA states that it is unlawful for any person in the course of maintaining, servicing, repairing, or disposing of refrigeration or air-conditioning equipment to knowingly vent or otherwise knowingly release or dispose of a class I or class II substance used as a refrigerant in the equipment in a manner which permits the substance to enter the environment.

In 1993, EPA promulgated regulations under section 608 of the CAA for the recycling of ozone-depleting refrigerants recovered during servicing and disposal of air-conditioning and refrigeration equipment (40 CFR part 82). The regulations require persons servicing refrigeration and air-conditioning equipment to observe service practices that reduce emissions of ozone depleting refrigerants. The regulations

also establish certification programs for technicians, recycling and recovery equipment, and off-site refrigerant reclaimers. In addition, EPA requires that ozone depleting refrigerants contained "in bulk" in appliances be removed prior to disposal of the appliances, and that all refrigeration and air-conditioning equipment (except for small appliances and room air conditioners) be provided with a servicing aperture that facilitates recovery of the refrigerant. Moreover, the Agency requires that substantial refrigerant leaks in equipment be repaired when discovered. These regulations significantly reduce emissions of ozone depleting refrigerants and therefore aid efforts to minimize damage to the ozone layer.

To facilitate compliance with section 608, EPA requires reporting and record keeping for technicians; technician certification programs; equipment testing organizations; refrigerant wholesalers and purchasers; refrigerant reclaimers; refrigeration and air-conditioning equipment owners; and other establishments that perform refrigerant removal, service, or disposal. These reporting and recordkeeping requirements help EPA evaluate the effectiveness of refrigerant regulations and reduce emissions of ozone-depleting substances.

Form Numbers: None.

Respondents/affected entities: Entities that recover, recycle, reclaim, sell or distribute in interstate commerce ozone-depleting refrigerants that contain chlorofluorocarbons (CFCs) or hydrochlorofluorocarbons (HCFCs); those that service, maintain, repair, or dispose of appliances containing CFC or HCFC refrigerants; and those that own or operate appliances containing more than 50 pounds of CFC or HCFC refrigerants.

Respondent's obligation to respond: Mandatory.

Estimated number of respondents: 883,680.

Frequency of response: Primarily annually, with the exception of technician testing organizations that are required to report biannually.

Total estimated burden: 320,537 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$14,202,991, which includes no capital or O&M costs.

Changes in the Estimates: There is a slight increase in the average annual burden hours currently identified in the current OMB Inventory of Approved

ICR Burdens due to a change in the estimates.

Acting Director, Collection Strategies Division.
