

Horizon Scanning System Protocol are working well and the reasons why they are working well; and (2) understand which elements of the AHRQ Healthcare Horizon Scanning System Protocol can be improved, how they might be improved, and the relative importance of suggested improvements.

All of these information collection activities will allow for an evaluation of the AHRQ Healthcare Horizon Scanning System, thereby creating the opportunity to both maintain and improve this important national

resource. The findings will be presented in a report to ECRI Institute and AHRQ.

Estimated Annual Respondent Burden

Mathematica expects a response rate of 80 percent from the sample of 67 experts for the Expert Survey—54 completed surveys. The Expert Survey is expected to require about 20 minutes, on average, to complete. Mathematica expects that Expert Consultation with 15 experts will be needed to confirm cases of inaccurate or missing information identified in the Expert Survey. The follow-ups should be about 10 minutes.

For the Stakeholder Survey, Mathematica expects that 30 percent of the sample of 700 stakeholders will be ineligible (i.e. will not find any of the presented reports relevant and therefore unable to rate a report) and that 65 percent of the eligible sample will complete, resulting in 319 completes. It should take about 30 minutes to complete the Stakeholder Survey. Mathematica will conduct semi-structured Key Informant Interviews, on average lasting 50 minutes, with 23 respondents.
