

reporting requirements, records retention requirements, and submit annual surveillance plans and annually report surveillance results.

In the Permanent Certification Program final rule (76 FR 1312–14), we solicited public comment on each of the information collections associated with the requirements described in regulation at 45 CFR 170.503(b), 170.520, and 170.523(f), (g), and (i), respectively. In the “2014 Edition” final rule (77 FR 54275–76), we sought comment on these collection requirements again and on

the information collection requirement at § 170.523(f)(8).

We anticipate that there will continue to be three ONC–ACBs participating in the ONC HIT Certification Program as this is the current number of ONC–ACBs. Therefore, we have aligned the estimated number of respondents for the applicable regulation provisions (i.e., §§ 170.523(f), 170.523(i), and 170.540(c)) with the current number of ONC–ACBs. We have also revised the estimated number of respondents for § 170.520 (new applicants for ONC–ACB status) based on past application and

authorization processes for ONC–ACBs. Similarly, we have revised the estimated number of respondents for § 170.503(b) (applicants for ONC–AA status) based on past selection processes for the ONC–AA. We have retained the same number of responses per respondent and average burden hours per response for the regulation provisions previously included in OMB control number 0995–0013.

Likely Respondents: ONC-Approved Accreditors and ONC-Authorized Certification Bodies

TOTAL ESTIMATED ANNUALIZED BURDEN—HOURS

OS specifically request comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency’s functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.
