Abstract: This ICR calculates the burden and costs associated with information collection and reporting activities from EPA and state NPDES general permits for point source discharges from the application of pesticides to waters of the United States. On November 27, 2006, EPA issued a final rule (hereinafter called the "2006 NPDES Pesticides Rule") clarifying circumstances in which an NPDES permit was not required to apply pesticide to, or over, including near, waters of the U.S. On January 9, 2009, the Sixth Circuit Court vacated EPA's 2006 NPDES Pesticides Rule. As a result of the Court's decision, beginning October 31, 2011 NPDES permits were required for discharges to waters of the U.S. from the application of biological pesticides and chemical pesticides that leave a residue. Regulations governing permit requirements for NPDES discharges are codified at 40 CFR part 122. This ICR includes information submitted or recorded by permittees as well as information used primarily by permitting authorities. The permitting authority will use the information to assess permittee compliance and modify/add new permit requirements as appropriate. The estimated burden in this ICR is based on EPA's NPDES Pesticide General Permit (PGP).

Form Numbers: 6100–22, 6100–23, 6100–24, 6100–25, 6100–26.

Respondents/affected entities: Pesticide applicators.

Respondent's obligation to respond: mandatory (40 CFR 122).

Estimated number of respondents: 365,047 total (365,000 permittees, 47 permitting authorities [46 states and Virgin Islands]).

Frequency of response: varies from once, every 5 years, to occasionally as needed.

Total estimated burden: 834,756 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$38,662,462 (\$38,462,682 for permittees and \$199,780 for permitting authorities), includes \$0 annualized capital or O&M costs.

Changes in the Estimates: There is a decrease of 12,896 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. EPA expects that the 2016 PGP will be similar to the 2011 PGP. All of the decrease in burden is attributable to the shift from the 2011 PGP to the 2016 PGP in year 3 of this ICR when permittees renewing their coverage

would not need to develop a new Pesticide Discharge Management Plan.

Abstract: Section 1433 of the Safe Drinking Water Act, as amended by the Bioterrorism Act, requires each community water system serving a population of more than 3,300 people to conduct a vulnerability assessment of its water system and to prepare or revise an emergency response plan that incorporates the results of the vulnerability assessment. These requirements are mandatory under the statute. EPA will continue to use the information collected under this ICR to determine whether community water systems have conducted vulnerability assessments and prepared or revised emergency response plans in compliance with Section 1433. EPA is required to protect all vulnerability assessments and all information derived from them from disclosure to unauthorized parties and has established an Information Protection Protocol describing how that will be accomplished.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this action are community water systems serving more than 3,300 persons.

Respondent's obligation to respond: Mandatory (Section 1433 of the Safe Drinking Water Act, as amended by the Bioterrorism Act).

Estimated number of respondents: 80 (total).

Frequency of response: Once.

Total estimated burden: 8,994 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$803,501 (per year), includes \$337 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no increase of hours in the total estimated respondent burden compared with the ICR currently approved by OMB. The cost increase is an adjustment to the respondent burden estimates to account for inflation.
