1:15 p.m.–2:45 p.m.—Panel 2:

Experience with Operator Actions

Panel 2 will focus on the experience market participants have with out-of-market operator actions. In particular, this panel will explore the extent to which panelists believe such operator actions affect the operation and revenues/costs of market participants that own generation assets and serve load. Panelists will be asked to provide specific examples, based on their experience, of operator actions that they believe have negatively impacted the price formation process. To the extent possible, panelists will be asked to discuss differences among the approaches taken by the RTOs and ISOs to incorporate otherwise un-modeled constraints into the unit commitment and economic dispatch processes. Panelists will also be asked to comment on the information that would be most helpful to them in understanding why resources are committed for reasons other than economics and how those commitments affect prices and make-whole charges. Finally, panelists will be asked for their recommendations to improve the price formation process.

Panelists:

- Andrew Hartshorn, NRG/Boston Energy Trading & Marketing
- Michael Schnitzer, NorthBridge Group, speaking on behalf of Entergy Nuclear Power Marketing, LLC

3:00 p.m.–4:30 p.m.—Panel 3: Options to Reduce the Market Impacts of Operator Actions

Panel 3 will focus on practices that RTOs and ISOs have adopted, plan to

adopt, or might consider adopting to incorporate otherwise un-modeled constraints (e.g., voltage constraints) into the unit commitment and economic dispatch processes. These practices include, but are not limited to: Pricing run enhancements to expand the types of resources that are eligible to set the clearing price for energy; adjustments to better align the market model with the physical operation of the system; transmission constraint relaxation; ramping products and reserve products that better reflect the costs of supplemental commitments operators might make to address uncertainty. Panelists will be asked to discuss the factors that influence the ability to adopt any of the above practices and to discuss the considerations made when choosing among these practices. Panelists will also be asked to discuss other options to better reflect currently un-priced operator actions in market clearing prices.
