SUPPLEMENTARY INFORMATION:

I. Abstract

The objective of this collection is to build better inventories of landslides through citizen participation. This project will make it possible for the public to report their observations of landslides on a USGS-hosted Web site. The information gathered through the on-line database will be used to classify the landslides and damage, as well as provide information to scientists about the location, time, speed, and size of the landslides. The USGS Landslide Hazards Program has developed an interactive Web site for public reporting of landslides.
