The License Limitation Program (LLP) restricts access to the commercial groundfish fisheries, commercial crab fisheries and commercial scallop fisheries in the Exclusive Economic Zone off Alaska except for certain areas where alternative programs exist. The intended effect of the LLP is to limit the number of participants and reduce fishing capacity in fisheries off Alaska.

For a vessel designated on an LLP license, the LLP license authorizes the type of fishing gear that may be used by the vessel, the maximum size of the vessel, and whether the vessel may catch and process fish at sea or if it is limited to delivering catch without at-sea processing. LLP licenses that allow vessels to catch and process at-sea are assigned a catcher/processor endorsement. LLP licenses specify the maximum length over all (MLOA) of the vessel to which that LLP license may be assigned. Regulations implementing the LLP prohibit participants in LLP groundfish fisheries from using a vessel to fish for LLP groundfish that has a length overall that is greater than the MLOA specified on the LLP license. The LLP also includes a species endorsement for Pacific cod in the BSAI and GOA.

An LLP license is required onboard any vessel deployed in scallop fisheries in Federal waters off Alaska (except for some diving operations). The scallop LLP is intended to limit the number of participants and reduce fishing capacity in the scallop fishery off Alaska. The scallop LLP will limit the number of participants and reduce fishing capacity in the scallop fishery off Alaska.

Regulations at 50 CFR 665, Subpart F, require that a vessel must be registered to a valid federal fishing permit if it is used to fish with longline gear for Pacific pelagic management unit species (PMUS), land or transship longline caught PMUS, or receive longline caught PMUS from a longline vessel, within the Exclusive Economic Zone (EEZ) of United States (U.S.) islands in the central and western Pacific, or to fish with troll and handline gear for PMUS within the EEZ around each of the Pacific Remote Island Areas (PRIA).

Regulations at 50 CFR parts 665, Subparts D and E, require that the owner of a vessel used to fish for, land, or transship bottomfish management

unit species (BMUS) using a large vessel (50 ft or longer) around Guam, or using a vessel within the EEZ around each of the PRIA, must register it to a valid federal fishing permit they hold.

Regulations at 50 CFR 665, Subparts B, C, D and E, require that a vessel used to fish for precious corals within the EEZ of U.S. islands in the central and western Pacific, must be registered to a valid federal fishing permit for a specific precious coral permit area.

This collection of information is needed for permit issuance, to identify actual or potential participants in the fishery, determine qualifications for permits, and to help measure the impacts of management controls on the participants in the fishery. The permit program is also an effective tool in the enforcement of fishery regulations and facilitates communication between the National Marine Fisheries Service (NMFS) and fishermen.
