SUPPLEMENTARY INFORMATION:

I. Abstract

On September 26, 2014, we published a notice in the **Federal Register** (79 FR 57969) announcing the submission of the revised information collection conducted under OMB Control Number 1076-0135, Reporting Systems for Public Law 102-477 Demonstration Project. In response to the notice, we received requests to extend the comment period to allow additional time for tribes to review and comment on the revised forms and related materials. All the related forms and documents to this revision are available for review under the following Web site at <http://www.bia.gov/WhoWeAre/AS-IA/ORM/477Forms/index.htm>.

There are currently four information collections associated with this OMB Control Number: IA 7701—Narrative Report; IA 7702—Statistical Report; IA 7703—Financial Report; and IA 7703A—Tribal Temporary Assistance for Needy Families (TANF) Financial Report. These forms are included in this request and will continue to be authorized for use until 2017.

The revision reduces the number of forms to two: Statistical Report and Financial Expenditure Report. The previous TANF Financial Report and Financial Report have been combined to create the Financial Expenditure Report, allowing tribes to complete and submit the information on one form. Revisions were made to the Narrative Report and Statistical Report to provide clear instructions and guidance. In addition, a new guidance document, “Function Cost Categories,” has been added for reference.

The new reporting forms (Version 2) will replace the currently approved forms (Version 1) after 2017. To the

extent possible, tribes should begin using the new reporting forms (Version 2) as they enter new contracts, but in no case later than the 2017 expiration date. Until then, the BIA will continue to accept either version of the forms to ensure a smooth transition in reporting and to allow time for training and technical assistance.

II. Request for Comments

The Assistant Secretary—Indian Affairs requests your comments on this collection concerning: (a) The necessity of this information collection for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) The accuracy of the agency’s estimate of the burden (hours and cost) of the collection of information, including the validity of the methodology and assumptions used; (c) Ways we could enhance the quality, utility, and clarity of the information to be collected; and (d) Ways we could minimize the burden of the collection of the information on the respondents.

Please note that an agency may not conduct or sponsor, and an individual need not respond to, a collection of information unless it has a valid OMB Control Number.

It is our policy to make all comments available to the public for review at the location listed in the **ADDRESSES** section. Before including your address, phone number, email address or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Notice of Availability of the Final White-Tailed Deer Management Plan, Environmental Impact Statement, Cuyahoga Valley National Park, Ohio

AGENCY: National Park Service, Interior.

ACTION: Notice of availability.

SUMMARY: The National Park Service (NPS) announces the availability of the Final White-Tailed Deer Management Plan/Environmental Impact Statement (Plan/EIS), Cuyahoga Valley National Park (Park), Ohio.

DATES: The NPS will execute a Record of Decision (ROD) no sooner than 30 days from the date of publication of the Notice of Availability of the Final Plan/EIS in the **Federal Register** by the U.S. Environmental Protection Agency.

ADDRESSES: A limited number of hard-copies of the Final Plan/EIS may be picked up in-person or may be obtained by making a request in writing to Cuyahoga Valley National Park, 15610 Vaughn Road, Brecksville, Ohio 44141. The document is also available on the internet at the NPS Planning, Environment, and Public Comment Web site at: <http://parkplanning.nps.gov/CUVAdeerplan>.

FOR FURTHER INFORMATION CONTACT:

Chief of the Resource Management Division, Lisa Petit, at the address above, or by telephone at (440) 546-5970.

SUPPLEMENTARY INFORMATION: The Final Plan/EIS responds to, and incorporates as appropriate, agency and public comments received on the Draft Plan/EIS, which was available for public and agency review and comment from July 26 to September 24, 2013. Two public meetings were held during the 60-day comment period to gather input on the Draft Plan/EIS. Sixty eight pieces of correspondence were received during the public review period. Agency and public comments and NPS responses are provided in Appendix F of the Final Plan/EIS.

The Final Plan/EIS considers four alternatives for the management of white-tailed deer at the Park. Under Alternative A (No Action), existing management actions would continue, including deer and vegetation monitoring, data management, and research. No new actions would occur to reduce the effects of deer overbrowsing. Alternative B (Combined Non-lethal Actions) would include all

actions described under Alternative A and would incorporate a combination of nonlethal actions, including the construction of large-scale deer exclosures (fencing) for the purposes of forest regeneration. Nonsurgical reproductive control of does would be used to restrict population growth when this technology meets certain criteria. Alternative C (Lethal Actions) would also include all actions described under Alternative A, and would add lethal deer management actions to reduce the herd size, including direct reduction of the deer herd by sharpshooting with firearms or by implementing capture and euthanasia of individual deer in certain circumstances where sharpshooting would not be appropriate.

Alternative D (Combined Lethal and Non-lethal Actions) is the NPS preferred alternative. Alternative D would include all actions described under Alternative A, and it would also incorporate a combination of lethal and nonlethal actions from Alternatives B and C. Sharpshooting and limited capture/euthanasia would be used initially to quickly reduce deer herd numbers. Then, population maintenance could be conducted either by nonsurgical reproductive control methods, if certain criteria are met, or by sharpshooting. Both of these population maintenance methods are retained as options in order to maintain maximum flexibility for future management.
