SUPPLEMENTARY INFORMATION: The AGOA (Title I of the Trade and Development Act of 2000, Public Law 106-200, as amended provides preferential tariff treatment for imports of certain textile and apparel products of beneficiary sub-Saharan African countries. The textile and apparel trade benefits under AGOA are available to imports of eligible products from countries that the President designates as “beneficiary sub-Saharan African countries,” provided that these countries: (1) Have adopted an effective visa system and related procedures to prevent unlawful transshipment of textile and apparel articles and the use of counterfeit documents in connection with shipment of such articles; and (2) have implemented and follow, or are making substantial progress toward implementing and following, certain customs procedures that assist the Customs Service in verifying the origin of the products. In Proclamation 8741 (October 25, 2011) the President designated Guinea as a “beneficiary sub-Saharan Africa country” and proclaimed that, for purposes of section 112(c) of the AGOA, Guinea shall be considered a lesser developed beneficiary sub-Saharan African country. In Proclamation 9145 (June 26, 2014), the President similarly designated Madagascar as a “beneficiary sub-Saharan Africa country” and, for purposes of section 112(c) of the AGOA, shall be considered a lesser developed beneficiary sub-Saharan African country.

In Proclamation 7350 (October 2, 2000), the President authorized the USTR to perform the function of determining whether eligible sub-Saharan beneficiary countries have met the two requirements described above. The President directed the USTR to announce any such determinations in the **Federal Register** and to implement them through modifications the Harmonized Tariff Schedule of the United States (HTS). Based on actions that both Guinea and Madagascar have taken, I have determined that each country have satisfied these two requirements. Accordingly, pursuant to the authority assigned to the USTR in

Proclamation 7350, U.S. note 7(a) to subchapter II of chapter 98 of the HTS, and U.S. notes 1 and 2(d) to subchapter XIX of the HTS are modified by inserting “Guinea” and “Madagascar” in alphabetical sequence in the list of countries. The foregoing modifications to the HTS are effective with respect to articles entered, or withdrawn from warehouse for consumption, on date of publication. Importers claiming preferential tariff treatment under the AGOA for entries of textile and apparel articles should ensure that those entries meet the applicable visa requirements. See Visa Requirements Under the African Growth and Opportunity Act, 66 FR 7837 (2001).

Michael B.G. Froman,

United States Trade Representative.

Background

Executive Order 12862 "Setting Customer Service Standards," direct Federal agencies to provide service to

the public that matches or exceeds the best service available in the private sector (58 FR 48257, September 11, 1993). In order to work continuously to ensure that our programs are effective and meet our customers' needs, FMCSA seeks to obtain OMB approval of a generic clearance to collect qualitative feedback from our customers on our service delivery. The surveys covered in this generic clearance will provide a means for FMCSA to collect this data directly from our customers. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perception, experiences and expectations, provide an early warning of issues with service, or focus attention on areas of communication, training or changes in operations that might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

The solicitation of feedback will target areas such as: Timeliness, appropriateness, accuracy of information, courtesy, efficiency of service delivery, and resolution of issues with service delivery. Responses will be assessed to plan and inform efforts to improve or maintain the quality of service offered to the public. If this information is not collected, vital feedback from customers and stakeholders on the Agency's services will be unavailable.

The Agency will only submit a collection for approval under this generic clearance if it meets the following conditions:

- The collections are voluntary.
- The collections are low-burden for respondents (based on considerations of total burden hours, total number of respondents, or burden-hours per respondent) and are low-cost for both the respondents and the Federal Government.
- The collections are noncontroversial and do not raise issues of concern to other Federal agencies.
- Any collection is targeted to the solicitation of opinions from respondents who have experience with the program or may have experience with the program in the near future.
