

participate in the Bimonthly Public Science Meeting discussions. All stakeholders and the public will continue to have the same opportunity to participate as discussants by registering for the meetings under the established procedures. Experts identified by the National Research Council, reviewed for conflict of interest and bias, will participate as discussants in their own capacity to contribute intellectual leadership to discussions on critical scientific questions. The final determination of who serves as an expert participant is made independently by the National Research Council.

VII. How to Submit Materials to the Docket at <http://www.regulations.gov>

It is EPA's policy to include all materials it receives in the public docket without change and to make the materials available online at <http://www.regulations.gov>, including any personal information provided, unless materials include information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through <http://www.regulations.gov> or email. Posting of materials received in the public docket is not an EPA endorsement of, or agreement with, any information or viewpoints presented in the materials, nor is it an EPA endorsement of the quality or correctness of such information and viewpoints. The <http://www.regulations.gov> Web site is an "anonymous access" system, which means that EPA will not know your identity or contact information unless you provide it in the body of your materials. If you send email comments directly to EPA without going through <http://www.regulations.gov>, your email address will be automatically captured and included as part of the materials that are placed in the public docket and made available on the Internet. If you submit electronic materials, EPA recommends that you include your name and other contact information in the body of your materials and with any disk or CD-ROM you submit. If EPA cannot read your materials due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your materials. Electronic files should avoid the use of special characters and any form of encryption and be free of any defects or viruses. For additional information about EPA's public docket, visit the EPA Docket Center homepage at <http://www.epa.gov/epahome/dockets.htm>.

All documents in the docket are listed in the <http://www.regulations.gov> index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically at <http://www.regulations.gov> or in hard copy at the ORD Docket in the EPA Headquarters Docket Center.
