The Defense Health Agency (DHA) Communications Division designed the ART as a secure, (Department of Defense Information Assurance Certification and Accreditation Process-certified with a Privacy Impact Assessment on file with the DHA Privacy and Civil Liberties Office) web-based system to track, refer, reflect, and report workload associated with resolution of beneficiary and/or provider inquiries. The ART is also the primary means by which DHA-Great Lakes staff capture medical authorization determinations and claims assistance information for remotely located service members, line of duty care, and for care under the Transitional Care for Service-related Conditions benefit.

Users are comprised of MHS customer service personnel, to include Beneficiary Counseling and Assistance Coordinators, Debt Collection Assistance Officers, DHA-Great Lakes staff, personnel, family support, recruiting command, case managers, and others who serve in a customer service support role. Only individuals with a valid need-to-know demonstrated by assigned official Government duties are granted access to the ART. These individuals must satisfy all personnel security criteria with special protection measures or restricted distribution as established by the data owner.

ART data reflects the customer service mission within the MHS: It helps customer service staff users prioritize and manage their case workload; it allows users to track beneficiary inquiry workload and resolution, of which a major component is educating beneficiaries on their TRICARE benefits.

PHI and PII entered into the system is received from individuals via a verbal or written exchange and is only collected to facilitate beneficiary case resolution. Authorized users may use the PII/PHI to obtain and verify TRICARE eligibility,

treatment, payment, and other healthcare operations information for a specific individual. All data collected is voluntarily given by the individual. At any time during the case resolution process, individuals may object to the collection of PHI and PII via verbal or written notice. Individuals are informed that without PII/PHI the authorized user of the system may not be able to assist in case resolution, and that answers to questions/concerns would be generalities regarding the topic at hand.

Title, Associated Form and OMB Number: Patient Centered Medical Home (PCMH) Staff Satisfaction Survey; 0720-TBD.

Type of Request: New.

Number of Respondents: 3,105.

Responses per Respondent: 2.

Annual Responses: 6,210.

Average Burden per Response: 10 minutes.

Annual Burden Hours: 1,035.

Needs and Uses: The information collection requirement is necessary to measure satisfaction among staff at direct care military treatment facilities (MTFs) that have been identified as current or potential future PCMHs. The survey will ask staff members what new PCMH processes are or are not working well at the clinic. It will also ask about teamwork among staff at the clinic, the overall clinic environment, and what available resources are assisting them in their provision of quality patient centered care. Eligible staff include: Physicians, nurse practitioners, physician assistants, registered nurses,

licensed practical nurses, corpsmen, and administrative staff. Over the next 5-7 years, the DoD will make a significant investment in this primary care transformation. By fielding a survey focused on primary care staff satisfaction, the MHS will be able to monitor our investment in PCMH and study how it affects our people. The goals of this survey effort are to assess staff satisfaction, attitudes and perceptions regarding the implementation of the Patient Centered Medical Home. Respondents will be all military, federal (GS/NSPS) and contracted medical professionals and support staff who work in PCMH clinics. The survey will be administered via a MHS/DoD platform that will capture response data. The survey will be administered via an online tool on a bi-annual basis to medical professionals and support staff. The population sample will receive a pre-notification, and reminder notifications to encourage participation.

Affected Public: Individuals and households; MTF contractor providers and support staff.

Frequency: Bi-annual.
