SUPPLEMENTARY INFORMATION: The Del Puerto Water District (Del Puerto WD) and the Cities of Turlock and Modesto propose to implement a regional solution to address water supply shortages within Del Puerto WD's service area on the west side of the San Joaquin River in San Joaquin, Stanislaus and Merced Counties. Specifically, the project proposes to deliver up to 59,000 acre-feet per year by 2045 of recycled water produced by the cities to the Delta Mendota Canal (DMC). After introduction to the DMC, the recycled water would be conveyed to Del Puerto WD customers, to the Central Valley Project Improvement Act-designated refuges or to San Luis Reservoir for storage, depending on time of year and water demand. The Draft EIS/EIR assesses the environmental effects of four alternatives being considered, which are described below. In each case (except for the No Action Alternative), operational exchanges with the Bureau of Reclamation may be necessary in order to balance seasonal supply and demand.

Under Alternative 1, the Combined Alignment Alternative, a new pipe would be constructed to deliver treated water from Turlock's facilities to the city of Modesto's pumping plant. From there, a pipeline would be constructed to deliver the combined water from both cities west, underneath the San Joaquin River. The pipeline would end at a new discharge structure on the DMC. The DMC would then be used to convey water to downstream users.

Alternative 2, the Separate Alignment Alternative, is similar to Alternative 1, except that separate pipelines would be constructed from the Modesto and Turlock water treatment facilities. There would be two crossings underneath the San Joaquin River, and two new discharge structures on the DMC.

Under Alternative 3, the Patterson Irrigation District (PID) Conveyance Alternative, Modesto and Turlock would continue to discharge their treated water to the San Joaquin River. The water would be diverted by PID at their existing intake on the river, which would need to be expanded, delivered to the DMC by way of an expanded PID conveyance system, and discharged to the DMC by way of a new outfall structure. From there, the water would be conveyed to downstream users. This alternative would require an expansion of PID's fish screen facility and a pipeline parallel to PID's main canal to accommodate increased water volume, but no new river crossings.

Alternative 4, the No Action Alternative, represents the state of the environment without implementation of any action alternatives. Modesto and Turlock would continue to discharge their treated municipal water to the San Joaquin River, and no additional water would be supplied to Del Puerto WD or the Central Valley Project Improvement Act refuges.
