

Rico. The proposed facility would process approximately 2,100 tons of municipal waste per day and generate a gross capacity of approximately 77 megawatts (MW). The Puerto Rico Electric Power Authority will purchase the power generated from the facility. The preferred location of the facility is the former site of the Global Fibers Paper Mill and would encompass approximately 79.6 acres of the 90-acre parcel. The proposal would include the following facility components: A municipal solid waste receiving and processing building; processed refuse fuel storage building; boiler and steam turbine; emission control system; ash processing and storage building; and other associated infrastructure and buildings. Two other connected actions include installation of an approximately 2.0-mile raw water line and construction of a 115 kilovolt (kV) transmission line approximately 0.8 miles in length. The connected actions will be addressed in the EIS.

Among the alternatives that RUS will address in the EIS is the No Action alternative, under which the proposal would not be undertaken. In the EIS, the effects of the proposal will be compared to the existing conditions in the proposal area. Public health and safety, environmental impacts, and engineering aspects of the proposal will be considered in the EIS.

RUS is the lead Federal agency, as defined at 40 CFR 1501.5, for preparation of the EIS. With this Notice, Federal and State agencies and federally recognized Native American Tribes with jurisdiction or special expertise are invited to be cooperating agencies. Such agencies or tribes may make a request to RUS to be a cooperating agency by contacting the RUS contact provided in this Notice. Designated cooperating agencies have certain responsibilities to support the NEPA and scoping process, as specified at 40 CFR 1501.6(b).

As part of its broad environmental review process, RUS must take into account the effect of the proposal on historic properties in accordance with Section 106 of the National Historic Preservation Act (Section 106) and its implementing regulation, "Protection of Historic Properties" (36 CFR part 800). Pursuant to 36 CFR 800.2(d)(3), RUS is using its procedures for public involvement under NEPA to meet its responsibilities to solicit and consider the views of the public during Section 106 review. Accordingly, comments submitted in response to this Notice will inform RUS decision-making during Section 106 review.

As applicable, the EIS will document changes in the affected environment and

environmental consequences that may have occurred since the PRIDCO-prepared Final EIS was published in 2010 and USEPA's PSD permit action. The PRIDCO-prepared Final EIS is available in both Spanish and English for review at the addresses provided in this Notice. USEPA PSD permit actions are available for review at the address provided in this notice. RUS's EIS will incorporate this documentation by reference and focus on those topics that have changed since PRIDCO's Final EIS was published. RUS's Draft EIS will be available for review and comment for 45 days. Following the 45-day review period, RUS will prepare a Final EIS. After a 30-day review period, RUS will publish a Record of Decision (ROD). Notices announcing the availability of the Draft EIS, Final EIS and the ROD will be published in the **Federal Register** and in local newspapers.

Any final action by RUS related to the proposal will be subject to, and contingent upon, compliance with all relevant executive orders and federal, state, and local environmental laws and regulations in addition to the completion of the environmental review requirements as prescribed in RUS's Environmental Policies and Procedures, 7 CFR part 1794, as amended.

The Convention and the Commission

The objective of the Convention is to ensure, through effective management, the long-term conservation and sustainable use of highly migratory fish stocks in the western and central Pacific Ocean in accordance with the United Nations Convention on the Law of the Sea of 10 December 1982 (UNCLOS) and the Agreement for the Implementation of the Provisions of the UNCLOS Relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks. It participated as a cooperating non-member of the Commission since it became operational in 2005. The United States became a Contracting Party to the Convention and a full member of the Commission when
