SUPPLEMENTARY INFORMATION:

I. Abstract

The National Survey of Children's Health (NSCH) Pretest project plan will consist of several panels to assess data collection mode preferences (Paper-and-Pencil Interviewing (PAPI) and Internet) of respondents, amount of respondent incentives to gain cooperation and participation in the survey, and telephone as a method of nonresponse follow-up.

The design for the pretest survey data collection is assumed to be two-phase: the first phase will screen for households with children and children with special health care needs; followed by the selection of a single child in households with children and phase two will present age-based topical questions. There are three separate age-based topical surveys that a household could be selected for: 0 to 5 year old children, 6 to 11 year old children, or 12 to 17 year old children. Census staff will develop a sampling plan to select a pretest sample of 16,000 households (addresses) from a vendor-provided sampling frame with split panels to test mode of administration (Mail and Web Push + Mail) and use of cash incentives (\$5 or \$10). The target overall response rate for the pretest is 70 percent for the screener and 80 percent for the topical questionnaire.

The pretest allows for the preparation of a successful first year production survey which enables the MCHB to produce national and state-based estimates on the health and well-being of children, their families, and their communities as well as estimates of the prevalence and impact of children with special health care needs.

II. Method of Collection

Mailout/Mailback Paper-and-Pencil Interviewing (PAPI) Treatment Groups Plans for the Mailout/Mailback pretest treatment groups include a sample of 8,000 households that will be mailed an English and Spanish language self-administered PAPI screening instrument (questionnaire) followed by a separate age-based topical instrument (questionnaire). The households selected for this group will all be sent a \$5 cash incentive with the initial request to complete the screener instrument. This group will then be further broken down into two different treatment groups: one group will receive a \$5 cash incentive with the topical instrument and the other will receive a \$10 cash incentive with the topical instrument. The sample sizes for each of these different cash incentive groups is 4,000 households.

Web Push + Mail Treatment Groups

Plans for the Web Push + Mail pretest treatment group include a sample of 8,000 households that will receive instructions on how to complete an English or Spanish language screening instrument (questionnaire) via the Web. The households selected for the Web Push + Mail pretest treatment group will be taken through the screening instrument to determine if they screen into one of the three topical

instruments. If a household lists at least one child who is 0 to 17 years old in the screener, they will be directed into a topical instrument immediately after the last screener question. The Web Push + Mail group is further broken down into differing incentive groups. Since the respondent is taken through both the screening and topical instruments at one time, either a \$5 or \$10 cash incentive is mailed along with the initial screening instrument request. Therefore, the Web Push + Mail pretest sample of 8,000 is broken out into two incentive groups of 4,000 households each. Since the Web Push + Mail group does not receive any topical mailing materials, they will not receive any additional incentives.

Certain Preserved Mushrooms From the People's Republic of China: Preliminary Results of Antidumping Duty New Shipper Review; 2013-2014

AGENCY: Enforcement and Compliance, International Trade Administration, Commerce.

DATES: *Effective* January 22, 2015.

SUMMARY: The Department of Commerce (the Department) is conducting a new shipper review of Dezhou Kaihang Agricultural Science Technology Co., Ltd. (Dezhou Kaihang) regarding the antidumping duty order on certain preserved mushrooms from the People's Republic of China (the PRC). The period of review (POR) is February 1, 2013, through February 28, 2014.¹ We preliminarily find that Dezhou Kaihang made a sale of subject merchandise at less than normal value. Interested parties are invited to comment on these preliminary results.
