

opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: High School Longitudinal Study of 2009 (HSLs:09) Second Follow-up Field Test and Main Study Panel Maintenance 2015

OMB Control Number: 1850-0852

Type of Review: A revision of an existing information collection.

Respondents/Affected Public: Individuals or Households

Total Estimated Number of Annual Responses: 5,417

Total Estimated Number of Annual Burden Hours: 808

Abstract: The High School Longitudinal Study of 2009 (HSLs:09) is a nationally representative, longitudinal study of more than 20,000 9th graders in 944 schools in 2009 who are being followed through their secondary and postsecondary years. The study focuses on understanding students' trajectories from the beginning of high school into postsecondary education or the workforce and beyond. What students decide to pursue when, why, and how are crucial questions for HSLs:09, especially, but not solely, in regards to science, technology, engineering, and math (STEM) courses, majors, and careers. To date, HSLs:09 measured math achievement gains in the first 3 years of high school and, like past studies, surveyed students, their parents, school administrators, school counselors, and teachers. After the initial 2009 data collection, the main study students were re-surveyed in 2012 when most were high school 11th-graders, and again in 2013 when most

had just graduated from high school. The second follow-up data collection will take place in early 2016, and will consist of a survey, postsecondary transcript collection, financial aid records collection, and file matching to extant data sources. The second follow-up focuses on postsecondary attendance patterns, field of study selection processes with particular emphasis on STEM, the postsecondary academic and social experience, education financing, employment history including instances of unemployment and underemployment, job characteristics including income and benefits, job values, family formation, and civic engagement. The HSLs:09 data elements are designed to support research that speaks to the underlying dynamics and education processes that influence student achievement, growth, and personal development over time. This request is to conduct the HSLs:09 Second Follow-up Field Test data collections (April-August 2015) and main study panel maintenance. The field test will inform the survey and data collection procedures for the 2016 main study.
