Impact on Availability of Affected Species or Stock for Taking for Subsistence Uses

There are no relevant subsistence uses of marine mammals implicated by this action. Therefore, NMFS has determined that the total taking of affected species or stocks would not have an unmitigable adverse impact on the availability of such species or stocks for taking for subsistence purposes.

Endangered Species Act (ESA)

None of the marine mammals for which incidental take is proposed are listed as threatened or endangered under the ESA. Therefore, NMFS has determined that issuance of the IHA to GFNMS under section 101(a)(5)(D) of the MMPA will have no effect on species listed as threatened or endangered under the ESA.

National Environmental Policy Act (NEPA)

In 2012, we prepared an EA analyzing the potential effects to the human environment from conducting rocky intertidal surveys along the California and Oregon coasts and issued a FONSI on the issuance of an IHA for GFNMS’ rocky intertidal surveys in accordance with section 6.01 of the NOAA Administrative Order 216–6 (Environmental Review Procedures for Implementing the National Environmental Policy Act, May 20, 1991). GFNMS’ proposed activities and impacts for 2015 are within the scope of our 2012 EA and FONSI. We have reviewed the 2012 EA and determined that there are no new direct, indirect, or cumulative impacts to the human and natural environment associated with the IHA requiring evaluation in a supplemental EA and we, therefore, reaffirm the 2012 FONSI.

Authorization

As a result of these determinations, NMFS has authorized the take of marine mammals incidental to GFNMS’ rocky intertidal and black abalone monitoring research activities, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated.

SUPPLEMENTARY INFORMATION:

Background

As provided by Congress in the Stevenson-Wydler Technology Innovation Act of 1980, the National Medal of Technology was first awarded in 1985. On August 9, 2007, the President signed the America COMPETES (Creating Opportunities to Meaningfully Promote Excellence in Technology, Education, and Science) Act of 2007. The Act amended Section 16 of the Stevenson-Wydler Technology Innovation Act of 1980, changing the name of the Medal to the “National Medal of Technology and Innovation.” The NMTI is the highest honor awarded by the President of the United States to America’s leading innovators in the
field of technology and is given annually to individuals, teams, or companies/non-profits who have made outstanding contributions to the promotion of technology or technological innovation, or to the development of technological manpower, for the improvement of the economic, environmental, or social well-being of the United States. The primary purpose of the NMTI is to recognize American innovators whose vision, creativity, and brilliance in moving ideas to market or in developing the nation’s technological manpower has had a profound and significant impact on our economy and way of life. The NMTI highlights the national importance of fostering technological innovation based upon solid science, resulting in commercially successful products and services.
