

Rules and Regulations

Federal Register

Vol. 80, No. 16

Monday, January 26, 2015

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 30, 37, 73, and 150

[NRC–2012–0140]

RIN 3150–AJ18

Safeguards Information—Modified Handling Categorization; Change for Materials Facilities

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Direct final rule; confirmation of effective date, NUREG issuance, and correction.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is confirming the effective date of January 28, 2015, for the direct final rule that was published in the **Federal Register** on September 30, 2014, which amended the NRC's regulations by removing the Safeguards Information—Modified Handling (SGI–M) designation for certain security-related information. The NRC is also announcing the availability of implementation guidance for the direct final rule, and correcting the “Compatibility Table for Direct Final Rule” appearing in Section V, “Compatibility of Agreement State Regulations,” of the direct final rule.

DATES: *Effective date:* The effective date of January 28, 2015, for the direct final rule published September 30, 2014 (79 FR 58664), is confirmed. The correction of the “Compatibility Table for Direct Final Rule” is effective January 26, 2015.

ADDRESSES: Please refer to Docket ID NRC–2012–0140 when contacting the NRC about the availability of information for this action. You may obtain publicly-available information related to this action by any of the following methods:

- Federal Rulemaking Web site: Go to <http://www.regulations.gov> and search

for Docket ID NRC–2012–0140. Address questions about NRC dockets to Carol Gallagher; telephone: 301–287–3422; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- NRC's Agencywide Documents Access and Management System (ADAMS): You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select “ADAMS Public Documents” and then select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to pdr.resource@nrc.gov.

- NRC's PDR: You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Vanessa Cox, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–8342, email: Vanessa.Cox@nrc.gov and Michelle Killian, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–6711, email: Michelle.Killian@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Confirmation of Effective Date

On September 30, 2014 (79 FR 58664), the NRC published a direct final rule amending its regulations in parts 30, 37, 73, and 150 of Title 10 of the *Code of Federal Regulations* (10 CFR) by removing the SGI–M designation of the security-related information for large irradiators, manufacturer and distributors, and for transport of category 1 quantities of radioactive material. The direct final rule also removed the SGI–M designation of the security-related information for the transportation of irradiated reactor fuel that weighs 100 grams or less in net weight of irradiated fuel. The security-related information for these facilities and the transportation of certain materials will no longer be designated as SGI–M and will be protected under

the information protection requirements that apply to other materials licensees that possess category 1 and category 2 quantities of radioactive material.

In the direct final rule, the NRC stated that if no significant adverse comments were received, the direct final rule would become effective on January 28, 2015. The NRC received one public comment from an anonymous commenter (ADAMS Accession No. ML14302A494) on the companion proposed rule. The commenter stated that the rule should be amended because it will require an additional information protection requirement on the product. The commenter also stated that the additional requirement would be needed so that the information relating to the product “would not get leaked.” The NRC staff reviewed this comment and concluded that this comment is not a significant adverse comment as defined in NUREG–BR–0053, Revision 6, “United States Nuclear Regulatory Commission Regulations Handbook” (ADAMS Accession No. ML052720461), because the comment does not present a reason or issue that warrants a substantive response. The comment does not aid the NRC's understanding of any concern with the NRC's decision to remove the SGI–M designations from some categories of information. Information that merits protection now falls within the information protection provisions of 10 CFR part 37. Therefore, this direct final rule will become effective as scheduled.

II. Availability of Guidance

The NRC is issuing revised NUREG–2155 (Rev 1), “Implementation Guidance of 10 CFR part 37, ‘Physical Protection of Category 1 and Category 2 Quantities of Radioactive Material,’” to conform the guidance to the direct final rule by removing references to the SGI–M designation and to make minor editorial changes and updates. The guidance is available in ADAMS under Accession No. ML15016A172.

III. Direct Final Rule; Correction

In the **Federal Register** (FR) on September 30, 2014, in FR Doc. 2014–23256, on page 58669, the following corrections are made to the table entitled, “Compatibility Table for Direct Final Rule:”

1. In the column entitled, “Existing,” in the seventh row, correct the

compatibility category “NRC” for § 37.43(d)(1) to read “C”.

2. In the column entitled, “New,” in the seventh row, add compatibility category “C” for § 37.43(d)(1).

These minor and administrative changes correct an error in the original document and do not change the substantive responsibilities of any person or entity regulated by the NRC.

Dated at Rockville, Maryland, this 20th day of January 2015.

For the Nuclear Regulatory Commission.

Cindy Bladey,

Chief, Rules, Announcements, and Directives Branch, Division of Administrative Services, Office of Administration.

BILLING CODE 7590-01-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2014-0587; Directorate Identifier 2013-NM-219-AD; Amendment 39-18059; AD 2014-26-08]

RIN 2120-AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are superseding Airworthiness Directive (AD) 2011-13-09 for all Airbus Model A330-200, -200F, and -300 series airplanes. AD 2011-13-09 required revising the maintenance program to incorporate new limitations and maintenance tasks for certain certification management requirements (CMRs). This new AD requires revising the maintenance or inspection program to incorporate new maintenance requirements and airworthiness limitations. This AD was prompted by a determination that more restrictive maintenance requirements and airworthiness limitations are necessary. We are issuing this AD to prevent safety-significant latent failures that would, in combination with one or more other specific failures or events, result in a hazardous or catastrophic failure condition.

DATES: This AD becomes effective March 2, 2015.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of March 2, 2015.

The Director of the Federal Register approved the incorporation by reference of a certain other publication listed in this AD as of August 1, 2011 (76 FR 37255, June 27, 2011).

ADDRESSES: You may examine the AD docket on the Internet at <http://www.regulations.gov/#!docketDetail;D=FAA-2014-0587>; or in person at the Docket Management Facility, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC.

For service information identified in this AD, contact Airbus SAS, Airworthiness Office—EAL, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 45 80; email airworthiness.A330@airbus.com; Internet <http://www.airbus.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221.

FOR FURTHER INFORMATION CONTACT:

Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone 425-227-1138; fax 425-227-1149.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2011-13-09, Amendment 39-16732 (76 FR 37255, June 27, 2011). AD 2011-13-09 applied to all Airbus Model A330-200, -200F, and -300 series airplanes. The NPRM published in the **Federal Register** on August 26, 2014 (79 FR 50869).

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Community, has issued EASA Airworthiness Directive 2013-0245, dated October 2, 2013 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”), to correct an unsafe condition for all Airbus Model A330-200, -200F, and -300 series airplanes. The MCAI states:

The airworthiness limitations are currently distributed in the Airbus A330 Airworthiness Limitations Section (ALS).

The mandatory instructions and airworthiness limitations applicable to the Certification Maintenance Requirements (CMR) are specified in Airbus A330 ALS Part 3, which is approved by the European Aviation Safety Agency (EASA).

The revision 04 of Airbus A330 ALS Part 3 introduces more restrictive maintenance requirements and/or airworthiness limitations. Failure to comply with this revision constitutes an unsafe condition.

For the reason described above, this new AD retains the requirements of EASA AD 2010-0264 [(http://ad.easa.europa.eu/blob/easa_ad_2010_0264.pdf)], which is superseded, and requires the implementation of the maintenance requirements as specified in Airbus A330 ALS Part 3 revision 04.

You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov/#!documentDetail;D=FAA-2014-0587-0002>.

Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM (79 FR 50869, August 26, 2014) or on the determination of the cost to the public.

Conclusion

We reviewed the relevant data and determined that air safety and the public interest require adopting this AD as proposed, with minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM (79 FR 50869, August 26, 2014) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM (79 FR 50869, August 26, 2014).

Costs of Compliance

We estimate that this AD affects 76 airplanes of U.S. registry.

The actions required by AD 2011-13-09, Amendment 39-16732 (76 FR 37255, June 27, 2011), and retained in this AD take about 1 work-hour per product, at an average labor rate of \$85 per work-hour. Based on these figures, the estimated cost of the actions that were required by AD 2011-13-09 is \$85 per product.

We also estimate that it will take about 1 work-hour per product to comply with the new basic requirements of this AD. The average labor rate is \$85 per work-hour. Based on these figures, we estimate the cost of this AD on U.S. operators to be \$6,460, or \$85 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. “Subtitle VII: Aviation Programs,” describes in more detail the scope of the Agency’s authority.
