II. Background and Purpose

The Coast Guard published a notice of proposed rulemaking (NPRM) in the **Federal Register** on November 28, 2014 entitled, “Requirements for MODUs and Other Vessels Conducting Outer Continental Shelf Activities With Dynamic Positioning Systems” (79 FR 70943). The proposed rule would establish minimum design, operation, training, and manning standards for mobile offshore drilling units (MODUs) and other vessels using dynamic positioning systems to engage in Outer Continental Shelf activities. Establishing these minimum standards is necessary to improve the safety of people and property involved in such operations, and the protection of the environment in which they operate. The rule would decrease the risk of a loss of position by a dynamically-positioned MODU or other vessel that could result in a fire, explosion, or subsea spill, and support the Coast Guard's strategic goals of maritime safety and protection of natural resources.

In the NPRM, we stated our intention to hold a public meeting, and to publish a notice to announce the location and date of that meeting (79 FR 70944). In order to allow sufficient time for the Coast Guard to hold such a meeting and receive any subsequent public comments on the NPRM, we are

extending the end of the public comment period from February 26, 2015 to May 27, 2015.

III. Authority

This notice is issued under the authority of 5 U.S.C. 552(a).

Dated: February 3, 2015.

Director of Commercial Regulations and Standards, U.S. Coast Guard.
