

Environmental Policy Act (NEPA) and the associated environmental impact analysis.

Three alternatives were analyzed in this Draft EIS, the No Action Alternative and two build alternatives: Alternative 1—Payne Gap and Alternative 2—Roxana.

No Action Alternative

Under the No Action Alternative, the Bureau would not acquire property or construct and operate a new USP or FPC. Existing USPs would remain overcrowded and prevent the Bureau from meeting its mission. The No Action Alternative does not meet the project purpose and need and is therefore, not considered a viable alternative. However, the No Action Alternative is analyzed in the Draft EIS because it serves as a baseline for comparing the proposed action. The purpose for this comparison is to allow the federal agency to assess the effects of taking no action versus implementing the proposed action. In some cases the no action alternative would result in impacts to certain resources if the proposed action is not implemented. Therefore, the assessment of the no action alternative is an important component of all NEPA documents.

Alternative 1—Payne Gap

Under Alternative 1, the Bureau would acquire approximately 753 acres of land known as the Payne Gap site. The site is located in eastern Letcher County, approximately 7 miles northeast of Whitesburg, along the Kentucky and Virginia border. The Bureau would then construct and operate a USP and FPC on this site.

Alternative 1 would require extensive earthwork to prepare the site for development. Approximately 10,912,130 cubic yards (yd³) of excavation and 13,823,012 yd³ of fill would be required prior to beginning construction activities. The Bureau would require a minimum of 300 acres for construction of the USP and FPC at this site.

Alternative 2—Roxana

Under Alternative 2, the Bureau would acquire approximately 700 acres of land known as the Roxana site. The site is located 7.5 miles west of Whitesburg, Kentucky. The Bureau would construct and operate a USP and FPC on this site.

Alternative 2 would also require extensive earthwork to prepare the site for development. Approximately 3,831,749 yd³ of material would need to be excavated from the site and approximately 4,293,001 yd³ of fill

would be required to prepare the site for construction activities. The Bureau would require a minimum of 300 acres for construction of the USP and FPC at this site.

Alternative 1 and Alternative 2 would both have significant impacts to geology, topography, and soils, as well as infrastructure and utilities, and traffic and transportation. Implementation of the proposed action under either alternative would also have the potential to impact threatened and endangered species, including the gray bat (*Myotis grisescens*) and Indiana bat (*Myotis sodalist*). Studies are ongoing to determine detailed impacts to winter and summer habitat. Coordination with the U.S. Fish and Wildlife Service is ongoing.

Selection and Application Guide to Ballistic-Resistant Body Armor

AGENCY: National Institute of Justice, DOJ.

ACTION: Notice.

SUMMARY: The National Institute of Justice (NIJ) announces publication of *Selection and Application Guide to Ballistic-Resistant Body Armor for Law Enforcement, Corrections and Public Safety*, NIJ Selection and Application Guide-0101.06. The document can be found here: <https://www.ncjrs.gov/pdffiles1/nij/247281.pdf>. NIJ has developed this document to provide guidance concerning the selection, procurement, use, care and maintenance, and other considerations related to ballistic-resistant body armor. NIJ Guide-0101.06 is a companion document to NIJ Standard-0101.06, *Ballistic Resistance of Body Armor*.

The previous guide published by NIJ on body armor, NIJ Guide 100-01, *Selection and Application Guide to Personal Body Armor*, was released in 2001. NIJ Guide-0101.06 incorporates new knowledge about ballistic-resistant armor that has been gained in the intervening 13 years as the result of both

NIJ-funded research and research funded by others. Whereas NIJ Guide 100-01 deals with both ballistic- and stab-resistant armor, NIJ Guide-0101.06 deals only with ballistic-resistant armor. It supersedes those portions of NIJ Guide 100-01 that deal with ballistic-resistant armor. It does not supersede those portions that deal with stab-resistant armor. A separate guide on stab-resistant armor will be published when NIJ Standard-0115.00, *Stab Resistance of Personal Body Armor*, is updated.
