BILLING CODE 6335-01-P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau.

Title: Survey of Housing Starts, Sales, and Completions.

Form Number(s): SOC-QI/SF.1, SOC-QI/MF.1.

OMB Control Number: 0607-0110.

Type of Request: Extension of a currently approved collection.

Burden Hours: 13,187.

Number of Respondents: 20,400.

Average Hours per Response: 5 minutes.

Needs and Uses: The U.S. Census Bureau is requesting an extension of the Survey of Housing Starts, Sales, and Completions, otherwise known as the Survey of Construction (SOC). Government agencies and private companies use statistics from SOC to monitor and evaluate the large and dynamic housing construction industry. Data for two principal economic indicators are produced from the SOC: New Residential Construction (housing starts and housing completions) and New Residential Sales. In addition, a number of other statistical series are produced, including extensive information on the physical characteristics of new residential buildings, and indexes measuring rates of inflation in the price of new buildings. These statistics are based on a sample of residential buildings in permit-issuing places and a road canvass in a sample of land areas not covered by building permit systems.

The field representatives (FRs) mail forms SOC-QI/SF.1 and SOC-QI/MF.1 to new respondents to complete. A few days later, the FRs either call or visit the respondents to enter their survey responses into a laptop computer using the Computer Assisted Personal Interviewing (CAPI) software formatted for the SOC-QI/SF.1 and SOC-QI/MF.1 forms. The respondents are home builders, real estate agents, rental agents, or new homeowners of sampled residential buildings. FRs contact respondents multiple times based on the number of projects in the sample and the number of months required to complete the project.

The Census Bureau uses the information collected in the SOC to publish estimates of the number of new residential housing units started, under construction, completed, and the number of new houses sold and for sale. The Census Bureau also publishes many financial and physical characteristics of new housing units. Government agencies use these statistics to evaluate economic policy, measure progress towards the national housing goal, make policy decisions, and formulate legislation. For example, the Board of Governors of the Federal Reserve System uses data from this survey to evaluate the effect of interest rates in this interest-rate sensitive area of the economy. The Bureau of Economic Analysis (BEA) uses the data in developing the Gross Domestic Product (GDP). The private sector uses the information for estimating the demand for building materials and the many products used in new housing and to
