I. Funding Opportunity Description

A. Background

The 2501 Program, administered by the OAO, is committed to ensuring equitable participation in USDA programs. Community-based and non-profit organizations, higher education institutions, and eligible tribal entities can play a critical role in addressing the unique difficulties socially disadvantaged and veteran farmers and ranchers face. Differences in demographics, culture, economics, and other factors preclude a single approach to identifying solutions that can benefit farmers and ranchers by connecting them with resources available from USDA.

1. The 2501 Program was authorized by the Food, Agriculture, Conservation, and Trade Act of 1990. The Food, Conservation and Energy Act of 2008 expanded the authority of the Secretary of Agriculture (the Secretary) to provide awards under the program and transferred the administrative authority to OAO. The 2014 Farm Bill further expanded the program to include outreach and assistance to veterans. The

2501 Program extends USDA's capacity to work with members of farming and ranching communities by funding projects that enhance the equitable participation of socially disadvantaged and veteran farmers and ranchers in USDA programs. Projects are intended to build lasting relationships between USDA and socially disadvantaged and veteran farmers and ranchers to improve their ability to start and maintain successful agricultural businesses.

2. Form of Submission

Organizations may only submit one proposal for funding.

B. Scope of Work

The 2501 Program provides funding for outreach and technical assistance projects designed to assist socially disadvantaged and veteran farmers and ranchers in owning and operating viable agricultural enterprises. The OAO requests applications from eligible entities, which will provide outreach and technical assistance to socially disadvantaged and veteran farmers and ranchers.

Proposed activities must address two or more of the following priority areas:

1. Assist socially disadvantaged or veteran farmers and ranchers in owning and operating successful farms and ranches;

2. Improve participation among socially disadvantaged or veteran farmers and ranchers in USDA programs;

3. Build relationships between current and prospective socially disadvantaged or veteran farmers and ranchers and USDA's local, state, regional and National offices;

4. Introduce agriculture-related information to socially disadvantaged or veteran farmers and ranchers through innovative outreach and technical assistance techniques.

To encourage information sharing and to build capacity among awardees, the OAO may require Project Directors to attend an annual training conference that can be expensed with awarded grant funds not to exceed \$1,000 for up to two authorized grantee personnel. The conference will allow awardees to share ideas and lessons learned, provide training on performance and financial reporting requirements, and provide information on USDA programs and services. In addition, Project Directors will have an opportunity to make contacts and gather information on best practices.

C. Anticipated Outputs/Outcomes

1. Outputs. The term "output" means an outreach or assistance activity, effort,

and associated work product related to improving the ability of socially disadvantaged and veteran farmers and ranchers to own and operate farms and ranches and to participate equitably in USDA programs and related activities. Outputs may be quantitative or qualitative but must be measurable during an assistance agreement funding period.

Examples of outputs from the projects to be funded under this announcement may include, but are not limited to, the following:

a. Number of socially disadvantaged and veteran farmers or ranchers served;

b. number of completed applications submitted for consideration for USDA programs;

c. number of socially disadvantaged and veteran farmers and ranchers who attended conferences or trainings;

d. number of conferences or training sessions held;

e. type and topic of educational materials distributed at outreach events;

f. creation of a program to enhance the viability of socially disadvantaged and veteran farmers and ranchers; or

g. activity that supports increased participation of socially disadvantaged farmers and ranchers and veteran farmers and ranchers in USDA programs.

Creation of progress and final reports will be required, as specified in Section VI, Subsection D, "Reporting Requirement."

2. Outcomes. The term "outcome" means the result, effect, or consequence that will occur from carrying out an outreach or assistance program or activity that is related to a programmatic goal or objective. Outcomes may be agricultural, behavioral, social, economic, or programmatic in nature.

Project Directors will be required to document anticipated outcomes that are funded under this announcement which should include but are not limited to:

a. Increase in participation in USDA programs among socially disadvantaged and veteran farmers and ranchers;

b. increase in receptiveness of socially disadvantaged and veteran farmers and ranchers to outreach efforts through effective communication;

c. increase in economic stability of socially disadvantaged and veteran farmers and ranchers within a defined geographic area;

d. increase in community marketing and sales opportunities for the products of socially disadvantaged and veteran farmers and ranchers; or

e. increased use of resource conservation and sustainability practices among socially disadvantaged and veteran farmers and ranchers.

3. Performance Measures. To be eligible for consideration for funding, the applicant must develop performance measures expected to be achieved through proposed activities. These performance measures will provide insight and will be the mechanism to track progress. It is expected that the description of performance measures will include an estimate of the number of socially disadvantaged and veteran farmers and ranchers served by the outreach and assistance activities of the project, including the assumptions used to make those estimates.

The following are questions to consider when developing output and outcome measures of quantitative and qualitative results:

- What are the measurable short term and longer term results the project will achieve?

- How does the plan measure progress in achieving the expected results (including outputs and outcomes) and how will the approach use resources effectively and efficiently?

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau.

Title: Survey of Housing Starts, Sales, and Completions.

Form Number(s): SOC-QI/SF.1, SOC-QI/MF.1.

OMB Control Number: 0607-0110.

Type of Request: Extension of a currently approved collection.

Burden Hours: 13,187.

Number of Respondents: 20,400.

Average Hours per Response: 5 minutes.

Needs and Uses: The U.S. Census Bureau is requesting an extension of the Survey of Housing Starts, Sales, and Completions, otherwise known as the Survey of Construction (SOC). Government agencies and private companies use statistics from SOC to monitor and evaluate the large and dynamic housing construction industry. Data for two principal economic indicators are produced from the SOC: New Residential Construction (housing starts and housing completions) and New Residential Sales. In addition, a number of other statistical series are produced, including extensive information on the physical characteristics of new residential buildings, and indexes measuring rates of inflation in the price of new buildings. These statistics are based on a sample of residential buildings in permit-issuing places and a road canvass in a sample of land areas not covered by building permit systems.

The field representatives (FRs) mail forms SOC-QI/SF.1 and SOC-QI/MF.1 to new respondents to complete. A few days later, the FRs either call or visit the respondents to enter their survey responses into a laptop computer using the Computer Assisted Personal Interviewing (CAPI) software formatted for the SOC-QI/SF.1 and SOC-QI/MF.1 forms. The respondents are home builders, real estate agents, rental agents, or new homeowners of sampled residential buildings. FRs contact respondents multiple times based on the number of projects in the sample and the number of months required to complete the project.

The Census Bureau uses the information collected in the SOC to publish estimates of the number of new residential housing units started, under construction, completed, and the number of new houses sold and for sale. The Census Bureau also publishes many financial and physical characteristics of new housing units. Government agencies use these statistics to evaluate economic policy, measure progress towards the national housing goal, make policy decisions, and formulate legislation. For example, the Board of Governors of the Federal Reserve System uses data from this survey to evaluate the effect of interest rates in this interest-rate sensitive area of the economy. The Bureau of Economic Analysis (BEA) uses the data in developing the Gross Domestic Product (GDP). The private sector uses the information for estimating the demand for building materials and the many products used in new housing and to
