Background: The Administrator of the U.S. General Services Administration established the Committee on June 20, 2011 (**Federal Register**/Vol. 76, No. 118) pursuant to Section 494 of the Energy Independence and Security Act of 2007 (EISA, 42 U.S.C. 17123). Under this authority, the Committee advises GSA on the rapid transformation of the Federal building portfolio to sustainable technologies and practices. The Committee reviews strategic plans, products and activities of the Office of Federal High-Performance Green Buildings and provides advice regarding how the Office can accomplish its mission most effectively.

The *Portfolio Prioritization* task group will pursue the motion of a committee member to “propose a process for Federal agencies to consistently incorporate green building and resilience requirements into their capital investment criteria and strategies.” The *Energy Use Index* task group will pursue the motion of a committee member to “develop guidelines for creating a new energy intensity metric [to reflect impacts of] densified facilities, centrally located workplace sites . . . and expansion of telework and hoteling.”

The conference calls will focus on how the task groups can best refine these motions into consensus recommendations of each group to the full Committee, which will in turn decide whether to proceed with formal

advice to GSA based upon these recommendations.
