## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### Public Notice for Waiver of Aeronautical Land-Use Assurance

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of intent of waiver with respect to land; Indianapolis International Airport, Indianapolis, Indiana.

**SUMMARY:** The FAA is considering a proposal to change 22.212 acres of airport land from the federal obligation dedicating it to aeronautical use and to authorize this land to be used for revenue producing, non-aeronautical purposes at Indianapolis International Airport, Indianapolis, Indiana. The aforementioned land is not needed for current or future aeronautical use.

The land is north of the Indianapolis Maintenance Center, west of the Indianapolis Maintenance Center's central energy plant, and industrial waste water treatment facility located just south of U.S. Route 40 and west of Brushwood Road. The land is not currently developed. A solar power generating facility is proposed for development on the land.

**DATES:** Comments must be received on or before March 23, 2015.

**ADDRESSES:** Documents are available for review by appointment at the FAA Chicago Airports District Office,

Melanie Myers, Program Manager, 2300 East Devon Avenue, Des Plaines, IL 60018 Telephone: (847) 294-7525/Fax: (847) 294-7046 and Eric Anderson, Indianapolis Airport Authority, 7800 Col. H. Weir Cook Memorial Drive, Indianapolis, IN 46241; (317) 487-5135.

Written comments on the Sponsor's request must be delivered or mailed to: Melanie Myers, Program Manager, Federal Aviation Administration, Chicago Airports District Office, 2300 East Devon Avenue, Des Plaines, IL 60018, Telephone Number: (847) 294-7525/FAX Number: (847) 294-7046.

**FOR FURTHER INFORMATION CONTACT:** Melanie Myers, Program Manager, Federal Aviation Administration, Chicago Airports District Office, 2300 East Devon Avenue, Des Plaines, IL 60018, Telephone Number: (847) 294-7525/FAX Number: (847) 294-7046.

**SUPPLEMENTARY INFORMATION:** In accordance with section 47107(h) of Title 49, United States Code, this notice is required to be published in the **Federal Register** 30 days before modifying the land-use assurance that requires the property to be used for an aeronautical purpose.

The vacant property consists of portions of 4 original airport acquired parcels. These parcels were acquired with local funds. The land is located outside the airport operations area. There are no impacts to the airport by allowing the Indianapolis Airport Authority to lease the property for solar energy generation.

The Indianapolis Airport Authority will control use of the parcel through terms and conditions of the ground lease. The lease will be subordinate to the sponsor's existing grant assurances. This will ensure that all activities on the parcel will be compatible with FAA requirements and airport operations. The disposition of proceeds from the lease of the airport property will be in accordance with FAA's Policy and Procedures Concerning the Use of Airport Revenue, published in the **Federal Register** on February 16, 1999 (64 FR 7696).

A fair market value (FMV) appraisal for the parcel was completed in September 2014 in accordance with FAA Order 5100.37A. The appraisal concluded that the FMV for an annual commercial ground lease of the property is \$5,342.98 per acre.

This notice announces that the FAA is considering the release of the subject airport property at the Indianapolis International Airport, Indianapolis, Indiana from its obligations to be maintained for aeronautical purposes. Approval does not constitute a

commitment by the FAA to financially assist in the change in use of the subject airport property nor a determination of eligibility for grant-in-aid funding from the FAA.

### Legal Description

A part of the Southeast Quarter and the Southwest Quarter of Section 21, Township 15 North, Range 2 East, Wayne Township, Marion County, Indiana, more particularly described as follows:

Commencing at brass disk (IAA monument 22-O) found at the Northeast corner of the Southeast Quarter of said Section 21; thence South 88 degrees 25 minutes 07 seconds West (all bearings are based on the Indiana State Plane Coordinate System, East Zone (NAD 83)) along the North line of said Southeast Quarter 2288.09 feet; thence South 01 degrees 34 minutes 53 seconds East perpendicular to the last described line 132.00 feet to a chain link fence and the POINT OF BEGINNING (the following four courses are along said chain link fence); (1) Thence South 45 degrees 01 minutes 35 seconds East 1095.49 feet; (2) thence South 44 degrees 54 minutes 51 seconds West 286.62 feet; (3) thence South 44 degrees 32 minutes 57 seconds East 19.33 feet; (4) thence south 44 degrees 55 minutes 22 seconds West 616.14 feet; thence North 50 degrees 12 minutes 17 seconds West 498.46 feet; thence North 39 degrees 47 minutes 43 seconds East 146.78 feet; thence North 50 degrees 12 minutes 17 seconds West 608.47 feet; thence North 44 degrees 58 minutes 25 seconds East 856.65 feet to the POINT OF BEGINNING, containing 22.212 acres, more or less.

Issued in Des Plaines, Illinois, on February 10, 2015.

**Deb Bartell,**

Acting Manager, Chicago Airports District Office, FAA, Great Lakes Region.

### Federal Highway Administration

[Docket No. FHWA-2015-0004]

#### Agency Information Collection

#### Activities: Request for Comments for Periodic Information Collection

**AGENCY:** Federal Highway Administration (FHWA), U.S. Department of Transportation.

**ACTION:** Notice of Request for Approval of a New Information Collection and Request for Comments.

**SUMMARY:** The FHWA invites the public to comment on our intention to request the Office of Management and Budget (OMB) to approve a new (periodic) information collection. This collection is summarized below under

Supplementary Information. We are required to publish this notice in the **Federal Register** by the Paperwork Reduction Act of 1995.

**DATES:** Please submit comments by April 20, 2015.

**ADDRESSES:** You may submit comments identified by DOT Docket ID Number 2015-0004 by any of the following methods:

*Web site:* For access to the docket to read background documents or comments received, go to the Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the online instructions for submitting comments.

*Fax:* 1-202-493-2251.

*Mail:* Docket Management Facility; U.S. Department of Transportation, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

*Hand Delivery or Courier:* U.S. Department of Transportation, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

**FOR FURTHER INFORMATION CONTACT:** Adella Santos, 202-366-5021, NHTS Program Manager, Federal Highway Administration, Office of Policy, 1200 New Jersey Avenue, SE., Room E83-426, Washington, DC 20590, Monday through Friday, except Federal holidays.

#### **SUPPLEMENTARY INFORMATION:**

*Title:* 2015 National Household Travel Survey (NHTS).

*Type of Request:* New request for periodic information collection requirement.

*Background:* Title 23, United States Code, Section 502 authorizes the USDOT to carry out advanced research and transportation research to measure the performance of the surface transportation systems in the US, including the efficiency, energy use, air quality, congestion, and safety of the highway and intermodal transportation systems. The USDOT is charged with the overall responsibility to obtain current information on national patterns of travel, which establishes a data base to better understand travel behavior, evaluate the use of transportation facilities, and gauge the impact of the USDOT's policies and programs.

The NHTS is the USDOT's authoritative nationally representative data source for daily passenger travel.

This inventory of travel behavior reflects travel mode (e.g., private vehicles, public transportation, walk and bike) and trip purpose (e.g., travel to work, school, recreation, personal/family trips) by U.S. household residents. Survey results are used by federal and state agencies to monitor the performance and adequacy of current facilities and infrastructure, and to plan for future needs.

The collection and analysis of national transportation data has been of critical importance for nearly half a century. Previous surveys were conducted in 1969, 1977, 1983, 1990, 1995, 2001, and 2009. The current survey will be the eighth in this series, and allow researchers, planners, and officials at the state and federal levels to monitor travel trends.

Data from the NHTS are widely used to support research needs within the USDOT, and State and local agencies, in addition to responding to queries from Congress, the research community and the media on important issues. Current and recent topics of interest include:

- Travel to work patterns by transportation mode for infrastructure improvements and congestion reduction,
- Access to public transit, paratransit, and rail services by various demographic groups,
- Measures of travel by mode to establish exposure rates for risk analyses,
- Support for Federal, State, and local planning activities and policy evaluation,
- Active transportation by walk and bike to establish the relationship to public health issues,
- Vehicle usage for energy consumption analysis,
- Traffic behavior of specific demographic group such as Millennials and the aging population.

Within the USDOT, the Federal Highway Administration (FHWA) holds responsibility for technical and funding coordination. The National Highway Traffic Safety Administration (NHTSA), Federal Transit Administration (FTA), and the Bureau of Transportation Statistics (BTS) are also primary data users, and have historically participated in project planning and financial support.

#### **Proposed Data Acquisition Methodology**

NHTS data are collected from a stratified random sample of households that represent a broad range of geographic and demographic characteristics. Letters and a brief household survey are sent to selected

households requesting some basic demographic and contact information and inviting them to participate in the survey. The recruitment surveys are returned in business reply envelopes to the survey contractor.

Participating households are subsequently sent a package containing travel logs for each member of the household age 5 and older. The household is assigned to record their travel on a specific day, and asked to note every trip taken during a 24 hour period. Based upon their preferences, the travel information is then reported either through the use of a survey Web site, or through a telephone interview.

Reminders are sent periodically to households who do not respond within the expected timeframe. Monetary incentives are included in each recruitment package, and are provided in increasing amounts for all households that complete the survey.

The survey will collect data during an entire 12 month period so that all 365 days of the year including weekends and holidays are accounted for. A total of 26,000 households will comprise the national sample for the 2015 survey. As described below, changes in the establishment of the sampling frame, the promotion of participation, and in data retrieval techniques are planned, as compared to previous surveys, to improve statistical precision, enhance response rates, and increase survey efficiency.

*Issues Related to Sampling.* In previous years, the household sample was identified using random digit dialing techniques. Today, only 59 percent<sup>1</sup> have a landline telephone in the home (down from 75% during the 2009 NHTS) while over 80 percent of U.S. households have access to the Internet.<sup>2</sup> This survey will leverage this shift in technology, in particular the move away from home telephone usage, to structure a research design that uses web, mail, and telephone data collection modes.

The revised methodological approach starts with a national address-based sample (ABS), a change from the telephone-based random digit dialing (RDD) sample design used in recent NHTS efforts, while also incorporating core data elements that have been part of the NHTS since 1969.

<sup>1</sup> Blumberg, S.J., and Luke, J.V. (2014). *Wireless substitution: Early release of estimates from the National Health Interview Survey, July–December 2013*. National Center for Health Statistics. Available from <http://www.cdc.gov/nchs/nhis.htm>.

<sup>2</sup> Source: U.S. Census Bureau, Current Population Survey, Select Years, Internet Release date: January 2014.

The survey sample will be drawn from the ABS frame maintained by Marketing Systems Group (MSG). It originates from the U.S. Postal Service (USPS) Computerized Delivery Sequence file (CDS), and is updated on a monthly basis. MSG also provides the ability to match some auxiliary variables (e.g., race/ethnicity, education, household income) to a set of sampled addresses. MSG geocodes their entire ABS frame, so block-, block group-, and tract-level characteristics from the Decennial Census and the American Community Survey (ACS) may be appended to addresses and used for sampling and/or data collection purposes.

**Sample Size.** A sample size of 26,000 households will be included in the national sample. Assuming response rates of 30 percent for the recruitment stage, 65 percent for the retrieval stage, and a residency rate of 89 percent for sampled addresses, a total of 149,813 sampled addresses will be required to attain the targeted 26,000 responding households.

**Stratification.** This survey produces state-level estimates as well as national estimates. Assuming equal costs and population variances across states, the most efficient design for national estimates is one in which the sample is allocated to the states in proportion to the size of the civilian, noninstitutionalized population in each state, and the most efficient design for state-level estimates is one in which equal sample sizes are allocated to all states. Various allocation options for the national sample are being considered in order to arrive at a final allocation for the NHTS national sample.

With the ABS approach, identifying targeted areas (e.g., states) that correspond to those for which estimates can be developed from the NHTS data are straightforward. Addresses are definitively linked to states, so state-level estimation is routine. Geocoding and GIS processing can be used to link addresses to counties in a highly reliable fashion. There can be some ambiguity for addresses that are P.O. boxes or are listed as rural route addresses. These can be handled in a routine manner with a set of well-defined rules as such addresses will represent only a small proportion of a state's population. Thus, no important issues arise in the definition of areas with an ABS sample design that relies on mail for data collection, as is the case with the proposed approach.

Assignments for recording travel data by sampled households will be equally distributed across all days to ensure a balanced day of week distribution. The

sample (of recruitment letters to households) will be released periodically through a process that will control the balance of travel days by month.

#### Data Collection Methods

An updated approach to enhancing survey response has been developed. This includes providing progressive monetary incentives, and using a mail-out/mail-back recruitment survey. This recruitment survey is designed to be relevant, aesthetically pleasing, and elicit participation by including topics of importance to the respondent. Upon returning the completed recruitment survey, each household member will be provided with personalized travel logs by mail, and offered the option of completing the retrieval survey by web using a unique personal identification number (PIN) or telephone interview.

#### Information Proposed for Collection

**Recruitment.** The survey will begin with mailing the sampled households a short recruitment survey designed to collect key household information (e.g. enumeration of household members), additional contact information (e.g. email address and telephone number). This recruitment survey includes some engaging travel-related opinion or experience questions considered to be highly relevant to the survey and interesting to respondents. The initial survey will be accompanied by a letter from the USDOT, and a Business Reply Envelope.

In the first mail contact, each sampled address will receive a \$2 cash incentive. The second mail contact will include the travel log package sent to each recruited household and a \$5 cash incentive and a promise of an additional \$20 for successfully submitting their travel logs. The incentives paid will be tracked at each of the three levels offered.

To support the mail recruitment approach, the survey contractor will provide a toll-free number on survey materials and will assist the recruited participant to provide the required information by telephone if requested to do so by the participant. A survey Web site will be established for potential respondents who want to check on the authenticity of the survey or find out more information. This Web site will also serve as the portal to the survey.

All returned recruitment surveys will be processed using commercial off-the-shelf software (COTS) technology. All data collected in the recruitment survey will be used to populate the household record in the survey database. As part of the non-response protocol, non-

responding households may also be provided the opportunity to recruit by web. If respondents call the help desk or use the web to complete, their responses are collected in the same survey database.

The mail back recruitment approach described here has been tested and found to be successful in several surveys funded by the Federal Government (e.g., the National Crime Victimization Survey); these surveys have proven this method can be implemented with large sample sizes covering vast geographic regions. This approach has been developed in response to declining recruitment rates in recent studies.

**Retrieval.** The NHTS data will be collected from respondents either from self-reporting via the web, or from professionally trained interviewers using a computer-assisted telephone interviewing (CATI) system. Either approach will be based upon a single database that allows for sophisticated branching and skip patterns to enhance data retrieval by asking only those questions that are necessary and appropriate for the individual participant. Look-up tables are included to assist with information such as vehicle makes and models. The Google map UI is used to assist in identifying specific place names and locations. The location data for the participant's home, workplace, or school are stored and automatically inserted in the dataset for trips after the first report. Household rostering is a list of all vehicles and persons in the household that allows a trip to be reported from one household member and can include another household member who travel together to be inserted into the record for the second person. This automatic insert of information reduces the burden of the second respondent to be queried about a trip already reported by the initial respondent.

Data range, consistency and edit checks are automatically programmed to reduce reporting error, survey length, and maintain the flow of information processing. Data cross checks also help reduce the burden by ensuring that the reporting is consistent within each trip.

Data retrieval is based upon materials provided to participants as shown below.

#### Travel Log Materials

**Travel Log Packet.** The travel log packet will include a letter, an exemplar log, and personalized travel logs for each age eligible person in the household, and will be sent using first class postage in a 6"x9" envelope. The envelopes will be branded to match the

letterhead used for the invitation letter. The second respondent incentive will be included with the travel logs. This \$5 cash incentive is expected to serve as a “good faith” incentive to encourage completion of the retrieval survey.

**Travel Log Letter.** A household letter will be included in the travel log packet. The letter will further familiarize the participants with the travel recording stage, identify the households’ travel date and provide details about when and how to complete the retrieval survey. The letter will also remind participants about the final \$20 household incentive. Like the invitation letter, the travel log letter will be branded.

**Travel Logs.** A personalized travel log will be provided for each household member (ages 5 and older). The logs are intended to be a memory jogger to guide accurate data collection and aid in the reporting of each place visited on the travel day.

**Exemplar Log.** Participants will be provided with an exemplar log with the instructions for recording the details about the places visited on the travel day.

All web and computer assisted telephone interview (CATI) instruments will be reviewed for Section 508 compliance using the rules specified in sections 1194.22—‘Web-based intranet and internet information and applications’ and 1194.23—‘Telecommunications products.’ All materials will be available in both English and Spanish language forms. Spanish translations will be developed using industry standards and will apply reverse-translation protocols.

#### Estimated Burden Hours For Information Collection

**Frequency:** This collection will be conducted every 5–7 years.

**Respondents.** A stratified random sample of 26,000 households across the 50 states and the District of Columbia will be included in the survey. Household will include an average of 2.5 members for a total of 65,000 individual respondents to the main survey.

**Estimated Average Burden per Response.** It will take approximately 5 minutes per household member to complete the recruitment data form, and 20 minutes to complete the retrieval survey. This results in a total of 25 minutes per household member.

**Total Annual Burden Hours.** It is estimated that a total of 65,000 persons will be included in the survey. This would result in approximately 27,083 hours of support for this data collection effort.

#### Public Comments Invited

You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection of information is necessary for the USDOT’s performance, including whether the information will have practical utility; (2) the data acquisition methods; (3) the accuracy of the USDOT’s estimate of the burden of the proposed information collection; (4) the types of data being acquired; (5) ways to enhance the quality, usefulness, and clarity of the collected information; and (6) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB’s clearance of this information collection.

**Authority:** The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.48.

Dated: February 13, 2015.

**Michael Howell,**

*Information Collection Officer, Federal Highway Administration.*

#### DEPARTMENT OF TRANSPORTATION

##### Federal Motor Carrier Safety Administration

**[Docket No FMCSA-2014-0177]**

##### Crash Weighting Research Findings

**AGENCY:** Federal Motor Carrier Safety Administration (FMCSA), DOT.

**ACTION:** Notice; Extension of comment period.

**SUMMARY:** FMCSA extends the comment period for its January 23, 2015, notice. This notice shares information on the “Crash Weighting Analysis” which informs decision-making about the feasibility of using a motor carrier’s role in crashes as an indicator of future crash risk. The January notice advised the public of the availability of the study report for review and comment, and requested feedback on what steps the Agency should take regarding crash and Police Accident Report (PAR) data quality. The Agency extends the deadline for comment from February 23 to March 25, 2015.

**DATES:** Comments must be received on or before [March 25, 2015].

**ADDRESSES:** You may submit comments identified by docket number FMCSA-2014-0177 using any one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>.

- *Fax:* 202-493-2251.
- *Mail:* Docket Management Facility (M-30), U.S. Department of Transportation, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590-0001.

- *Hand delivery or courier:* Same as mail address above, between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal holidays. The telephone number is 202-366-9329.

To avoid duplication, please use only one of these four methods. See the “Public Participation and Request for Comments” heading under the **SUPPLEMENTARY INFORMATION** section below for instructions on submitting comments.

**FOR FURTHER INFORMATION CONTACT:** Ms. Dee Williams, Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE, Washington, DC 20590, Telephone 202-366-1812 or by email: [dee.williams@dot.gov](mailto:dee.williams@dot.gov). FMCSA office hours are from 9 a.m. to 5 p.m., e.t., Monday through Friday, except Federal holidays. If you have questions on viewing or submitting material to the docket, contact Docket Operations at telephone 202-366-9826.

##### SUPPLEMENTARY INFORMATION:

##### I. Public Participation and Request for Comments

FMCSA encourages you to participate by submitting comments and related materials.

##### Submitting Comments

If you submit a comment, please include the docket number for this notice (FMCSA-2014-0177), indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so the Agency can contact you if it has questions regarding your submission.

To submit your comment online, go to <http://www.regulations.gov> and click on the “Submit a Comment” box, which will then become highlighted in blue. In the “Document Type” drop down menu, select “Rules,” insert “FMCSA-2014-0177” in the “Keyword” box, and click “Search.” When the new screen appears, click on “Submit a Comment” in the “Actions” column. If you submit your comments by mail or hand delivery, submit them in an unbound
