

burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Direct Comments to OMB: Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the: Office of Management and Budget, Office of Regulatory Affairs, *OIRA_submission@omb.eop.gov* or by fax to 202-395-6974, Attention: NIH Desk Officer.

DATES: *Comment due date:* Comments regarding this information collection are best assured of having their full effect if received within 7 days of the date of this publication.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and

instruments, contact Dr. Diane Post, Program Officer, Respiratory Diseases Branch, NIAID, NIH 5601 Fishers Lane, Bethesda, MD or call non-toll-free number at 240-627-3348 or email your request, including your address to: *postd@niaid.nih.gov*

SUPPLEMENTARY INFORMATION:

Proposed Collection: Human Influenza Surveillance of Health Care Centers in the United States and Taiwan, (NIAID), 0925—NEW, National Institute of Allergy and Infectious Diseases (NIAID), National Institutes of Health (NIH).

Need and Use of Information Collection: This study will identify individuals with influenza through focused surveillance in key regions of the United States and Taiwan, rapidly identify circulating influenza strains to identify those with pandemic potential and create an invaluable bank of human samples from patients with influenza to characterize the basis of severe

disease—a critical knowledge gap impacting effectiveness of decision-making around patient care. The 2014–15 influenza season is unique because the dominant circulating strain is an H3N2 strain that is not sensitive to the immunity induced by the influenza vaccine formulation administered to the general public. Our study will provide insight into viral determinants that may be contributing to the severity of influenza and associated morbidity and mortality this season. Capturing samples from this influenza season is essential for understanding the public health implications the virus may have in the future, and discerning the reasons behind the severity of the disease it causes.

OMB approval is requested for 6 months. There are no costs to respondents other than their time. The total estimated annualized burden hours are 500.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours
Patients	500	2	30/60	500

Dated: February 20, 2015.
