SUPPLEMENTARY INFORMATION:

Background

Atmosphere to Electrons (A2e) is a multi-year Department of Energy (DOE) research initiative targeting significant reductions in the cost of wind energy through an improved understanding of the complex physics of the wind resource and interaction with wind farms. Better insight into the flow physics and resource forecasting has the potential to increase wind farm energy capture, reduce annual operational costs, and improve project financing. Achieving these objectives requires a diverse set of expertise and significant R&D resources. The Wind and Water Power Technologies Office (WWPTO) has selected subject matter experts from its national laboratories at NREL, SNL, and PNNL to assist in the integrated program planning for the initiative based on DOE investments in world class computational and testing facilities as well as core expertise in topics critical to the success of the A2e initiative available at these laboratories. These national laboratories are engaging the wider wind energy stakeholder community (e.g., industry, other national labs, other government agencies, universities, international partners) to develop a multi-year strategic plan that addresses wind plant performance under the A2e initiative.

Public Participation

The event is open to the public based upon space availability. After the meeting has concluded DOE will also accept public comments on the meeting summary as described above for purposes of developing the A2e portfolio, but will not respond individually to comments received.

Participants should limit information and comments to those based on

personal experience, individual advice, information, or facts regarding this topic. It is not the object of this session to obtain any group position or consensus from the meeting participants. To most effectively use the limited time, please refrain from passing judgment on another participant’s recommendations or advice, and instead, concentrate on your individual experiences.

Individuals requiring special accommodations at the meeting, please contact Samantha Rooney no later than the close of business on March 17, 2015.

Issued in Washington, DC, on February 25, 2015.
