

training at PCMS using the Stryker family of vehicles.

Alternative 1B includes Alternative 1A and new training activities and training infrastructure changes at PCMS. Training activities in the Final EIS include electronic jamming systems, laser target sighting, tactical demolition, unmanned and unarmed aerial reconnaissance systems, and light unmanned ground vehicle training. In terms of training infrastructure, PCMS would establish two new drop-zones, and restricted airspace directly over PCMS for use during periods when training activity poses a hazard to non-participating aircraft. The restricted airspace would be activated as required by training scenarios. Among the changes made since publication of the Draft EIS are the removal of aviation rocket (2.75 inch) and flare training, removal of two of the original eight demolition sites from the proposed action, and reduction in the maximum charge per blast at one of the six remaining sites. The decision-maker may select all of the elements in Alternative 1B or only some (or none in the No Action alternative). Alternative 1B is the Army's preferred alternative.

Implementation of the proposed action could have significant impacts to soils, vegetation, wildlife, and water resources. The Final EIS identifies potential mitigation measures to reduce adverse impacts.

Soldier training would be entirely within the existing boundaries of PCMS, except for limited air and convoy operations. The proposed action does not include, nor would it require, any land expansion of PCMS. No additional land will be sought or acquired as a result of this action.

The U.S. Army plans to issue a Record of Decision no earlier than 30 days after the date of the U.S. Environmental Protection Agency's Notice of Availability. The Record of Decision will include adoption of mitigation measures. The Final EIS is available at <http://www.carson.army.mil/DPW/nepa.html>.
