SUPPLEMENTARY INFORMATION: This document extends the public comment period established in the **Federal Register** document of January 28, 2015. In that document, EPA made available for public comment a proposal to improve the corn rootworm insect resistance management program currently in place for registrations of plant-incorporated protectants (PIP) derived from *Bacillus thuringiensis* (Bt) in corn. The Agency is seeking input on the proposal from potentially affected entities and other stakeholders, including (but not limited to) registrants of pesticides and PIPs for corn, corn growers, crop consultants/agronomists, commodity groups, extension entomologists, independent researchers, and the general public. EPA has received several requests from stakeholders asking to extend the comment period. Requests from crop consultants, grower representatives, and academic researchers indicate that additional time is needed to develop and submit detailed information addressing various aspects of EPA’s proposal. EPA is hereby extending the comment period, which was set to end on March 16, 2015, to April 15, 2015.
