

IPTF also plans to draw on the Green Paper and earlier responses to past Requests for Public Comment; past respondents are invited to provide additional and updated viewpoints on IPTF efforts since those comments were provided.

Implementing the Multistakeholder Process: Commenters also may wish to provide their views on how stakeholder discussions of the proposed issue(s) should be structured to ensure openness, transparency, and consensus-building. Analogies to other Internet-related multistakeholder processes, whether they are concerned with policy or technical issues, could be especially valuable.

4. Please comment on the best structure and mechanics for the process(es). If different security issues will require different process structures, please offer guidance on how to best design an appropriate process for the issue selected.

5. How can the IPTF promote participation from a broad range of stakeholders, *i.e.*, from industry, civil society, academia, and international partners? In particular, how can we promote engagement from small and medium-sized enterprises (SME) that play key roles in the digital ecosystem? How critical is location for meetings, and what factors should be considered in determining where to host meetings?

6. What procedures and technologies can promote transparency of process, including promoting discussion between stakeholders and ensuring those outside the process can understand the decisions made?

7. What types of consensus outcomes can promote real security benefits without further adding to a compliance-oriented model of security?

8. Would certain cybersecurity issues be better served by a single workshop or other event to raise awareness and promote independent action, rather than a longer multistakeholder, consensus-building process?

9. How should evaluation of the processes be conducted to assess results and to ensure that recommendations and outcomes of the process remain actionable and current?

Response to this Request for Public Comment is voluntary. Commenters are free to address any or all of the issues identified above, as well as provide information on other topics that they think are relevant to promoting voluntary coordinated action to address cybersecurity risks through an open, transparent, voluntary, consensus-based process. Please note that the Government will not pay for response

preparation or for the use of any information contained in the response.
