

**DEPARTMENT OF AGRICULTURE****Agricultural Research Service****Notice of Intent To Grant Exclusive License**

**AGENCY:** Agricultural Research Service, USDA.

**ACTION:** Notice of intent.

**SUMMARY:** Notice is hereby given that the U.S. Department of Agriculture, Agricultural Research Service, intends to grant to RENEWABLE NUTRIENTS, LLC. of PINEHURST, NORTH CAROLINA, an exclusive license to U.S. Patent No. 8,574,885, "ANAMMOX BACTERIUM ISOLATE," issued on NOVEMBER 5, 2013.

**DATES:** Comments must be received on or before April 20, 2015.

**ADDRESSES:** Send comments to: USDA, ARS, Office of Technology Transfer, 5601 Sunnyside Avenue, Rm. 4-1174, Beltsville, Maryland 20705-5131.

**FOR FURTHER INFORMATION CONTACT:** Mojdeh Bahar of the Office of Technology Transfer at the Beltsville address given above; telephone: 301-504-5989.

**SUPPLEMENTARY INFORMATION:** The Federal Government's patent rights in this invention are assigned to the United States of America, as represented by the Secretary of Agriculture. It is in the public interest to so license this invention as RENEWABLE NUTRIENTS, LLC. of PINEHURST, NORTH CAROLINA has submitted a complete and sufficient application for a license. The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within thirty (30) days from the date of this published Notice, the Agricultural Research Service receives written evidence and argument which establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

**Mojdeh Bahar,**

*Assistant Administrator.*

**DEPARTMENT OF AGRICULTURE****National Agricultural Statistics Service****Notice of Intent To Reinstate an Information Collection**

**AGENCY:** National Agricultural Statistics Service, USDA.

**ACTION:** Notice and request for comments.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995, this notice announces the intention of the National Agricultural Statistics Service (NASS) to seek reinstatement of an information collection, the Census of Agriculture Content Test. Response to this survey will be voluntary.

**DATES:** Comments on this notice must be received by May 18, 2015 to be assured of consideration.

**ADDRESSES:** You may submit comments, identified by docket number 0535-0243, by any of the following methods:

- *Email:* [ombofficer@nass.usda.gov](mailto:ombofficer@nass.usda.gov).

Include docket number above in the subject line of the message.

- *eFax:* (855) 838-6382

- *Mail:* Mail any paper, disk, or CD-ROM submissions to: David Hancock, NASS Clearance Officer, U.S. Department of Agriculture, Room 5336 South Building, 1400 Independence Avenue SW., Washington, DC 20250-2024.

- *Hand Delivery/Courier:* Hand deliver to: David Hancock, NASS Clearance Officer, U.S. Department of Agriculture, Room 5336 South Building, 1400 Independence Avenue SW., Washington, DC 20250-2024.

**FOR FURTHER INFORMATION CONTACT:** R. Renee Picanso, Associate Administrator, National Agricultural Statistics Service, U.S. Department of Agriculture, (202) 720-2707. Copies of this information collection and related instructions can be obtained without charge from David Hancock, NASS-OMB Clearance Officer, at (202) 690-2388 or at [ombofficer@nass.usda.gov](mailto:ombofficer@nass.usda.gov).

**SUPPLEMENTARY INFORMATION:** *Title:* Census of Agriculture Content Test.

*OMB Control Number:* 0535-0243.

*Type of Request:* Intent to Seek Reinstatement of an Information Collection.

*Abstract:* The Census of Agriculture, conducted every five years, is the primary source of statistics concerning the Nation's agricultural industry and provides the basis for the Nation's comparable and robust agricultural data. Results of the 2012 Census of Agriculture are available on the Web at <http://www.agcensus.usda.gov/>. This Information Collection activity will reinstate the Census of Agriculture Content Test. The purpose of this Content Test is to evaluate proposed changes to the survey methodology and content to reduce respondent burden and maintain the relevance of quality of statistics produced using the Census of Agriculture: Questionnaire format and

design, new questions, changes to question wording and location, overall respondent burden, ease of completion, and processing methodology (such as editing and data summary). Results of this test will be studied in preparation for the 2017 Census of Agriculture. Development of the test questionnaire version will come from evaluation of the 2012 Census of Agriculture, testing panels, and cognitive interviews. NASS will also meet with other USDA and Federal agencies and selected State Departments of Agriculture to gather information on data uses and, in some cases, justifications for county-level data. The test will be nation-wide, excluding Alaska and Hawaii, and will be conducted in three phases. For Phase One, a stratified random sample of approximately 50,000 farm and ranch operators will be mailed questionnaires; stratification will be used to ensure sufficient coverage of various sizes, locations and types of agricultural operations. The sample will be divided into control and treatment groups to test alternative versions of the questionnaires. Non-respondents will receive follow-up contact by first mail, then telephone.

Phase Two will consist of up to 400 randomly selected agricultural operations that will be asked to participate in cognitive interviews. The sample will consist of some agricultural operations that completed the questionnaire in Phase One, as well as some additional operations selected to ensure sufficient size of comparison groups. The cognitive interviews conducted with Phase One respondents will be used to improve the overall 2017 Census of Agriculture questionnaire by allowing NASS to follow-up with respondents to better understand unusual responses and to ascertain question comprehension. The remainder of the cognitive interview sample will be randomly selected from operations to meet size and type criteria to ensure sufficient cases for quantitative comparisons. The cognitive interviews of this group will test further 2017 Census of Agriculture questionnaire variations, including the Internet version.

For Phase Three a stratified random sample of approximately 15,000 will be mailed letters asking them to go to a supplied Internet address to complete the survey. Stratification will be used to ensure sufficient coverage of various sizes and types of agricultural operations. The sample will be divided into control and treatment groups to test alternative versions of the on-line questionnaires and methods to increase
