k. **Description of Request:** The licensee requests a temporary variance of the license-required minimum flow requirements at five locations in 2015 as a measure to respond to the current drought conditions in California. Specifically, the licensee requests Commission approval to:

- Reduce minimum streamflows in the Silver Fork American River below Silver Lake dam (gage A–8) from the required 4 cfs or natural flow to 2 cfs or natural flow in April and May
- Reduce minimum streamflows in Pyramid Creek below Lake Aloha main dam (gage A–40) from the required 3 cfs to 2 cfs or natural flow in April, and from the required 5 cfs to 2 cfs or natural flow in May

The licensee states that implementing the proposed minimum flow variances would preserve reservoir storage for project purposes, including meeting consumptive water needs and ensuring adequate streamflow and reservoir storage at the project.
