response will protect workers and the public during recovery activities. The Board will also consider the issue of how DOE will manage external pressure to resume waste operations without compromising the safety attributes of the plan’s key elements. The Board will then examine DOE’s safety basis strategy for WIPP recovery operations and upgrades, including the criteria for determining whether upgrades need to be planned and executed as major modifications. This will include actions being taken by DOE and the site contractor to ensure that hazards during the recovery phases are properly identified and implemented. The final topic in Session II concerns DOE’s strategy for providing adequate federal oversight during the recovery phase. In Session III, the Board will again receive testimony from a panel comprised of senior managers from DOE EM, CBFO, NWP, and the WIPP Accident Investigation Board Chairman. The Board will receive testimony on actions to correct deficiencies in key safety management programs such as emergency management, maintenance and engineering, fire protection, and nuclear safety. The Board will end Session III with a discussion of DOE’s strategy for improving the effectiveness of federal oversight of contractor activities, including specific actions to ensure that improvements made by the site contractor and DOE are sustained over the long term. In Session IV, the Board will conclude the proceeding with testimony from its senior staff regarding an update to the public on the Board’s proposed oversight actions associated with safe recovery of the underground, and oversight of corrective actions to resume and sustain safe waste operations. The Board is then expected to conduct deliberations concerning the staff’s proposed oversight plan. The meeting will conclude with the Board’s vote on the staff’s recommendation.
