Available Transfer Capability
Standards for Wholesale Electric
Transmission Services; Supplemental
Notice of Workshop—New Date

As discussed in prior notices, the Federal Energy Regulatory Commission (Commission) staff will hold a workshop to discuss standards for calculating Available Transfer Capability (ATC) for wholesale electric transmission services.¹ In light of the inclement weather occurring on the originally proposed date, the workshop is rescheduled for Tuesday, April 21, 2015.

The workshop is prompted by the filing by the North American Electric Reliability Corporation (NERC) proposing changes to its ATC-related reliability standards,² and the initiative to replace these standards with similarly focused business practice standards to be developed by the North American Energy Standards Board (NAESB).³

The workshop will commence at 12:00 noon and conclude by 4:15 p.m., EST. The workshop will be held in the Commission Meeting Room at the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC, 20426. Commission members may participate in the workshop.

This Notice contains an Agenda that is materially the same as the Updated Agenda previously issued in this docket. However, specific details may change as Commission staff finalizes the agenda, including the list of featured speakers, times of the session discussions or details of the topics to be discussed. The Commission will issue an additional Notice as needed. This workshop is free of charge and open to the public. Commission members may participate in the workshop.

Those who plan to attend the workshop are encouraged to complete the registration form located at: <https://www.ferc.gov/whats-new/>

¹ Prior Notices were issued on December 30, 2014, and January 30 and February 27, 2015.

² NERC's proposal is currently pending before the Commission in the rulemaking: *Modeling, Data, and Analysis Reliability Standards*, Notice of Proposed Rulemaking, Docket No. RM14-7-000; 79 FR 36269 (June 26, 2014). While this workshop is not convened for the purpose of discussing specific cases, the workshop may address matters that are at issue in the NERC proceeding.
