

This ASAOC requires Williams perform an Engineering Evaluation and Cost Analysis (EE/CA) report to develop, evaluate, and select cleanup alternatives involving mining waste piles and other surface features located on the federally owned portion of OU1 at the Site. The performance of this work must be approved and monitored by the Forest Service. Also under the ASAOC, Williams will reimburse up to \$7,500 of the Forest Service's oversight costs related to the EE/CA.

For thirty (30) days following the date of publication of this notice, the United States will receive written comments relating to the ASAOC. The United States will consider all comments received and may modify or withdraw its consent to the ASAOC if comments received disclose facts or considerations that indicate that the settlement is inappropriate, improper, or inadequate. The United States' response to any comments received will be available for public inspection at the USDA, Office of General Counsel, Mountain Region, 740 Simms Street, Golden, Colorado 80401, and the Forest Service's Southwestern Regional Office, 333 Broadway SE., Albuquerque, NM 87102.

DATES: Comments must be submitted on or before May 7, 2015.

ADDRESSES: The proposed settlement and additional background information relating to the settlement are available for public inspection at the offices located at the United States Department of Agriculture, Forest Service, Southwestern Regional Office, 333 Broadway SE., Albuquerque, NM 87102, or from Kirk M. Minckler with USDA's Office of the General Counsel, (303) 275-5549. Comments should reference the Nacimiento Mine, Santa Fe National Forest, Sandoval County, New Mexico, and should be addressed to Kirk M. Minckler, USDA Office of the General Counsel, P.O. Box 25005, Denver, CO 80225-005.

FOR FURTHER INFORMATION CONTACT: For technical information, contact Steven J. McDonald, USDA Forest Service Southwestern Region, 333 Broadway SE., Albuquerque, NM 87102, phone (505) 842-3838. SUPPLEMENTARY INFORMATION:

I. Abstract

The mission of the Geography Division (GEO) within the Census Bureau is to plan, coordinate, and administer all geographic and cartographic activities needed to facilitate Census Bureau statistical programs throughout the United States and its territories. GEO manages programs to continuously update geographic data including addresses, spatial features, boundaries, and geographic entities in the Master Address File/Topologically Integrated Geographic Encoding and Referencing System (MAF/TIGER) System. GEO also conducts research into geographic concepts, methods, and standards needed to facilitate Census Bureau data collection and dissemination programs. Geographic Partnership Programs (GPPs) encourages participants, following Census Bureau guidelines, to review, update, and suggest modifications to geographic data to maintain MAF/TIGER and to ensure the

accurate reporting of data from censuses and surveys. Because state, local, and tribal governments have geographic data and current knowledge about where growth and change are occurring in their jurisdictions, their input into the overall development of a continually maintained address list for censuses and surveys makes a vital contribution. The Census Bureau recognizes that state, local, and tribal governments have authoritative geographic data for their jurisdiction. The benefits to local governments in sharing that information as part of the Census Bureau's GPPs are realized with quality data for more accurate results of censuses and surveys.

II. Method of Collection

This notice is for a generic clearance that will cover a number of activities required for updating MAF/TIGER with participant-provided address and other geographic information, or obtain address and spatial data for research and evaluation purposes. The information collected in these programs in cooperation with state, local, and tribal governments and other partners is essential to the mission of the Census Bureau and directly contributes to the successful outcome of censuses and surveys conducted by the Census Bureau. The generic clearance allows the Census Bureau to focus its resources on actual operational planning, development of procedures, and implementation of programs to update and improve the geographic data maintained in MAF/TIGER.

The Census Bureau will develop guidelines and procedures for state, local, and tribal government submissions of address data and geographic boundaries, and will outline the mutual roles and responsibilities of each party within each GPP. The GPP listed below, is not exhaustive of all activities that may be performed under this generic clearance. The Census Bureau will follow the approved procedure when submitting any additional activities not specifically listed here.

Geographic Support System Initiative (GSS-I)

The GSS-I is an integrated program designed to improve geographic data and enhance the quality assessment and measurement for MAF/TIGER. The GSS-I builds on the accomplishments of the last decade's MAF/TIGER Enhancement Program (MTEP), which redesigned MAF/TIGER, improved the positional accuracy of TIGER spatial features, and emphasized quality measurement. The Census Bureau plans

on a continual update process for MAF/TIGER throughout the decade to support current surveys, including the American Community Survey (ACS). Major participants are the Census Bureau with state, local, and tribal governments. The Census Bureau will contact state, local, and tribal governments to obtain files containing their geographic data to explore data exchange opportunities, and share best practices on maintaining quality geographic data. Governments can provide a file of their geographic data or provide data through a web-based application sponsored by the Census Bureau. Governments can choose the format and medium to provide their data directly to the Census Bureau, or may elect to standardize their data using Community TIGER.
